

ThriveAtHome — Build Phases Reference (v4.0)

Last updated: June 2026 — reflects actual build state

This document reflects what has actually been built, what is in progress, and what remains. It supersedes all previous versions of the build phases document.

Platform Overview

ThriveAtHome is a senior independence platform with five layers:

Layer	What It Is
Layer 1 — AI Connection	Daily AI check-ins, family dashboard, alerts engine
Layer 2 — Human Network	Volunteers (all types), paid companions, student network
Layer 3 — Community	Virtual/local events, communities, skill exchange, interest groups
Layer 4 — Services	Transport, home services, meals, health, legal/financial, tech help
Layer 5 — Celebrations & Transitions	Celebrations, life story archive, grief support, memory books

Pricing Model (confirmed)

Plan	Price	Key Features
Thrive Basics	\$19/mo	Daily AI check-ins, family dashboard, alerts, document vault
Thrive Connect	\$39/mo	Basics + Communities, events, volunteers, skill exchange, benefits finder
Thrive Complete	\$69/mo	Connect + care navigator (2 hrs/mo), grief circles, services marketplace
Thrive Premier	\$129/mo	Complete + dedicated navigator (8 hrs/mo), companion credits (\$50/mo), celebrations, concierge

Memory Book pricing: Premier/Complete = free unlimited; Connect = Book \$14.99 / Collage \$9.99 / Both \$19.99; Basics = Book \$19.99 / Collage \$12.99 / Both \$24.99. Memorial Edition: free Premier/Complete, \$24.99 Connect/Basics.

Build Status Summary

Milestone	Status	Notes
M1 Foundation	✓ COMPLETE	Phases 1-4
M2 Member Data	✓ COMPLETE	Phases 5-7
M3 UI System	✓ COMPLETE	Phase 8 — warm luxury design system
M4 Realtime	✓ COMPLETE	Phase 9
M5 Alert Engine	✓ COMPLETE	Phases 10-11
M6 Family Dashboard	✓ COMPLETE	Phases 12-14
M7 Navigator Console	✓ COMPLETE	Phases 15-16
M8 AI Calls	⏸ DEFERRED	Activate with RETELL_API_KEY + TWILIO credentials
M9 Concierge Line	⏸ DEFERRED	Activate with second Twilio number
M10 SMS/Email	⏸ DEFERRED	Activate with SENDGRID_API_KEY + TWILIO credentials
M11 Billing	✓ COMPLETE	Phases 24-26, Stripe billing live
M12 Compliance	✓ COMPLETE	Phases 27-28, privacy policy, HIPAA baseline
M13 Volunteer Network	✓ COMPLETE	Phases 29-33
M14 Community Layer	✓ COMPLETE	Phases 34-38
M15 Celebrations & Life Story	✓ COMPLETE	Phases 39-41
M16 Grief & Transitions	✓ COMPLETE	Phases 42-44
M17 Services Marketplace	🌀 IN PROGRESS	Phase 45 transport done, 46-50 remaining
M18 Enterprise	☐ NOT STARTED	Phases 51-55

What Has Been Built (Complete)

M1-M6 — Foundation + Family Layer

- Next.js 16 app deployed on Vercel
- Supabase database with 45+ tables, RLS, audit logging
- Supabase Auth with role-based access (family, navigator, admin, volunteer, student, employer_admin)
- 8 service interfaces with stub implementations — real services

- activate via env vars
- Family dashboard: wellness card, mood timeline, alerts, family tasks, messages, document vault
- Real-time alerts via Supabase Realtime + push-notification Edge Function
- Crisis detection with 5-step escalation
- Call history page, family coordination tools

M7 — Navigator Console

- Caseload table with unified action feed
- Alert queue with acknowledge functionality
- Member detail panel with slide-out
- Navigator notes, pre-call brief (stub)
- Service request dispatch panel with volunteer assignment
- Grief support referral tracking
- Today's tasks with priority badges

M11 — Stripe Billing

- 4 subscription plans live in Stripe (test mode)
- Checkout flow, webhook handler, billing management page
- Customer portal for self-serve plan changes
- Gift subscriptions feature
- Plan display on dashboard

M12 — HIPAA Baseline

- Privacy policy page at /privacy
- Data deletion endpoint
- Audit logging on health data access
- HTTPS enforced via Vercel
- BAAs: pending (required before real user data)

M13 — Volunteer Network

- Volunteer application form at /volunteer/apply
- Volunteer matching algorithm (location +25, interests +15 each, language +20, availability +10)
- Veteran-specific volunteer track with VSO fields
- Driver's license and car insurance fields for transport volunteers
- Volunteer dashboard at /volunteer/dashboard (impact stats, connections, visit log, download service record)
- Student volunteer portal at /student (service hours tracker, PDF service record)
- Admin volunteer queue at /admin/volunteers
- Admin volunteer matching at /admin/volunteer-matching
- Migrations: 005, 006, 007, 008, 009

M14 — Community Layer

- **Communities** (renamed from Cultural Circles) at /dashboard/communities
 - 12 cultural/ethnic circles seeded
 - 8 interest-based circles seeded (Gardening, Books, Music, Cooking, Faith, Sports, Travel, Crafts)
 - Two sections: "Cultural & Heritage Communities" and "Interest"

- & Hobby Communities”
- Recommended for you section based on member interests
- Admin can create new communities at /admin/communities
- Admin URL renamed from /admin/cultural-circles to /admin/communities
- URL redirect: /dashboard/cultural-circles → /dashboard/communities
- **Virtual Events** at /dashboard/events
 - Events calendar with RSVP
 - Platform-wide events visible to all members
 - External events discovery (Meetup, Eventbrite, Luma placeholders)
 - In-person event support with location field
 - Interest-based event ordering
 - Hydration error fix for timezone mismatch
- **Skill Exchange** at /dashboard/skill-exchange
 - Register skills, request exchanges, time credit ledger
 - Complete exchange transfers credits
- **Interest Groups** at /dashboard/groups
- **Benefits Finder** at /dashboard/benefits (15+ federal programs)
- **Employer Portal MVP** at /employers (demo request form)
- Migrations: 010, 011, 012, 013, 016, 017

M15 — Celebrations & Life Story

- **Celebrations Engine** at /dashboard/celebrations
 - Birthday detection cron (D-7 family notification, D-0 dashboard banner)
 - Milestone recognition: First Check-In, 30-Day Streak
 - Gold birthday banner on family dashboard
 - celebration_events table
- **Life Story Archive** at /dashboard/life-story
 - Entry types: Memory, First Memory (* gold star), Milestone, Recipe, Tradition, Wisdom
 - Era grouping: Childhood, Young Adult, Career, Family, Later Life
 - File attachments: photos (thumbnails), PDFs (paperclip + download)
 - Supabase Storage bucket: life-story-attachments (private)
 - Multiple First Memory entries allowed (restriction removed)
- **Memory Book Builder**
 - Two formats: Memory Book PDF (8.5x11 multi-page) + Memory Collage (12x12 frameable)
 - Collage layouts: Grid, Mosaic, Timeline, Magazine
 - Photo count selector, quote prominence, background styles
 - Draft system (saves config references, persists across sessions)
 - Preview with watermark before payment
 - Pricing by plan tier (checked at payment time)
 - 3 free regenerations within 30 days
 - Abuse prevention: blocks new purchase within 30 days
 - Memorial Edition for inactive members
 - @react-pdf/renderer for Shutterfly-quality output
- Migrations: 018, 019, 020, 021, 022

M16 — Grief & Life Transitions

- **Grief & Transition Support** at /dashboard/grief-support
 - 4 pathway cards: Loss of loved one, Major health diagnosis, Major life change, Support for caregivers

- Grief support request form → creates grief_support_requests row
 - Check-in frequency auto-updates to daily on submission
 - Trusted resources with clickable external links
 - Support history section
 - **Life Transition Pathways** (Phase 43)
 - 5 pathway cards including Loss of driving independence
 - Prolonged grief detection cron
 - Anniversary sensitivity (daily check-ins near loss anniversaries)
 - **Professional Referral Network** (Phase 44)
 - Navigator referral panel in member detail
 - External support referral with type select + notes + Record referral button
 - Grief monitoring cron at /api/cron/grief-monitoring
 - Migrations: 023, 024
-

In Progress

M17 — Services Marketplace (Phases 45-50)

Phase 45 — Transport Services ✓ Done - /dashboard/services hub with 6 category cards - Transport booking request form - service_bookings table - Navigator dispatch panel with volunteer assignment - Family dashboard shows upcoming services - Migration: 025

Phase 46 — Home Services + Meals ⚡ In progress

Phase 47 — Health Services + Legal/Financial + Tech Help ☐ Not started

Phase 48 — Paid Companion Marketplace ☐ Not started - Requires Stripe Connect setup

Phase 49 — On-Demand Tech Help ☐ Not started

Phase 50 — Services Dashboard Integration ☐ Not started - Upcoming services on family dashboard - Service history view - Navigator console shows all member bookings

Phase 50a — Prescription Refill Management ⚠ SUPERSEDED by Phase 50j - Original narrow prescription-only feature - Replaced by Phase 50j Important Dates & Renewals — prescriptions are now one item_type within the broader configurable system rather than a standalone feature

Phase 50b — Gift Sending Platform ⚡ In progress - Gift intent detection in Aria calls → family notification - Gift marketplace: Flowers, Food, Gift Cards, Handwritten Cards, Gift Baskets - 15% platform commission on all gift orders - Stub fulfillment via 1-800-Flowers, Goldbelly, Amazon Gift Cards - Gift delivery tracking on family dashboard

Phase 50c — Family-Initiated Celebrations ⚡ In progress - Special occasion requests from /dashboard/celebrations - Three tiers: Digital (free), Enhanced (\$25), Premier (\$75) - Personalized Aria celebration calls using life story entries - Family coordination room for linked family members - Navigator handles Enhanced and Premier logistics

Phase 50d — Family Events Calendar & Senior Gift-Giving 🌀 In progress - Family events calendar: birthdays, anniversaries, graduations, travel, parties, holidays, new babies - family_events table with reminder_days_before setting - Aria mentions upcoming family events in check-in calls - Senior sends gift to family via platform (stub: 1-800-Flowers, Goldbelly, Amazon) - Senior sends physical card — \$4.99, platform prints and mails - Celebration notes — free digital message, shareable link or PDF - Family travel awareness — Aria adjusts call tone during family travel - New baby/milestone Aria celebration scripts

Phase 50e — Platform Automations (17 rules) 🌀 In progress - Health: prescription refill prediction, doctor appointment reminder, vaccination reminders, isolation detection - Safety: extreme weather alerts, seasonal home safety checks, fall risk flag - Social: volunteer re-engagement, event no-show follow-up, benefits renewal reminder - Administrative: subscription value summary, inactive family nudge, onboarding completion reminder, navigator caseload warning - Services: transport follow-up, tech help success check, meal delivery feedback - Global rules: audit logged, family opt-out per member, max 2 notifications/day/family

Phase 50f — Geographic Chapter System 🌀 In progress - metro_areas table with 10 seeded US metros - Member auto-assigned to chapter by zip code - Volunteer matching: same chapter +30 pts, same state +15 pts - “Near you” badge on local chapter events - Chapter auto-activates at 50+ members - Chapter landing page at /chapter/[slug] - Rural members get full virtual service — no degraded experience

Phase 50g — Member Safety & Fraud Protection 🌀 In progress - Soft age verification (65+ DOB) — no ID upload required - Background checks: volunteers/companions/navigators only — NEVER for members - Aria detects: gift card requests, new friend money requests, tech support scams, lottery scams, romance scams - Large purchase notification to family (>\$50) - New vendor contact alerts - fraud_flags table visible to family and navigator - Scam education content in tech help section - “Report a concern” button on family dashboard

Phase 50h — Three-Layer Social Connection 🌀 In progress - Layer 1: Circle posts with auto-redact of contact info (already partially built) - Layer 2: Friend requests (circle/event members only), private messaging inside platform, contact info auto-redacted, money request scanning - Layer 3: Navigator-facilitated introductions with AI member matching - Security: Report button on posts/messages, community guidelines acknowledgment screen - Deferred to Year 2: public community feed, full social graph, friend feeds, mutual friends visibility

Phase 50i — Human Buddy Feature ⚠️ SUPERSEDED by Phases 33a-33f - Original draft of the Buddy feature, replaced by the fuller Phases 33a-33f spec (database layer, matching UI, buddy portal, navigator tools, family dashboard, onboarding questions)

Phase 50j — Important Dates & Renewals (replaces Phase 50a) 🌀 In progress - Generalized tracked_items system covering: prescriptions, home/car/health insurance, driver’s license, car registration, AAA membership, passport, gym membership, appointments, other - Member-configurable item types with sensible defaults (reminder lead time, recurrence cycle) fully editable per item

- Document upload per item — insurance card photo, registration document, appointment confirmation (tracked-item-attachments Storage bucket) - Aria proactively mentions upcoming items in calls, same pattern as Family Events - Member response actions: snooze, request navigator help renewing, mark done, reschedule/cancel (appointments) - Recurring items auto-advance to next cycle when marked complete; one-time items (passport) just complete - Navigator action panel shows all tracked items sorted soonest-first with renewal request tasks - Family dashboard card showing upcoming items color-coded by urgency

Phase 50l — Corporate Employee Volunteer Program 🔄 In progress - B2B feature distinct from subscription caregiver benefit — second revenue line from employer's corporate giving/CSR budget, not just HR/benefits budget - corporate_volunteer_programs + corporate_volunteer_hours tables - Volunteer application links employee to their employer's program - Employer admin exports hours in Benevity-compatible and YourCause-compatible CSV formats (the platforms companies like Cisco and Genentech use to match employee volunteer hours with cash donations) - Employee volunteer dashboard shows hours, cap remaining, and estimated matching value generated for their employer - Navigator spot-check verification - Pricing tiers: Community Partner (\$5K-15K/yr), Champion (\$15K-35K/yr), Leader (\$35K-50K+/yr) - Can be sold standalone or bundled with subscription PEPM benefit

Phase 50k — Roadside Assistance & Car Repair 🔄 In progress - 9th service category — split into 🚑 Emergency Roadside and 🚗 Car Repair & Maintenance - Emergency: flat tyre, battery jump, lockout, towing, fuel delivery, other roadside emergency - Non-emergency: scheduled maintenance, body shop, mechanic (non-urgent), car inspection - Pre-fills from member's AAA membership or car insurance stored in tracked_items (Phase 50j) - Urgent flag for roadside emergencies only — bypasses standard dispatch queue; non-emergency repair requests follow normal low-priority navigator dispatch - Navigator dispatch panel shows membership/insurance details pre-populated + ServiceProviderPicker for vetted repair shops - Migration 032_car_repair_providers.sql seeded 2 vetted shops (Tony Martinez, Kevin Park) - Stub: [STUB][Roadside] Would call AAA/insurance roadside on behalf of member

M18 — Enterprise (Phases 51-54, Phase 55 moved to after M21)

Phase 51 — Outcomes Dashboard - Public outcomes page at /outcomes (anonymised aggregate stats) - Enterprise reporting at /admin/outcomes (per-employer charts)

Phase 52 — University Partnership Portal - Full university admin portal at /university-admin - Semester CSV export - Official service record PDF generation - Builds on existing student portal from M13

Phase 53 — Employer Portal Full Build - Full employer admin dashboard with utilisation reporting - Employee invitation flow with tokenised links - Employer billing integration (PEPM pricing) - Builds on employer MVP from M14

Phase 54 — Medicare Advantage Reporting API -
/api/enterprise/outcomes endpoint - Aggregated metrics only
(minimum cohort 10) - Rate limiting (100 requests/partner/day) - API
access audit logging

AI Voice Agent Architecture — 12 Named Agents ✓ COMPLETE (September 2026)

All 12 Retell AI voice agents built and configured with distinct names, personalities, voices:

#	Name	Role	Direction
1	Aria	Daily morning companion	Outbound → Senior
2	Rosa	Care Line — service requests	Inbound ← Senior
3	Joy	Celebration calls — birthdays/milestones	Outbound → Senior
4	Grace	Reminder calls — appointments/welfare	Outbound → Senior
5	Hope	Crisis support line — 24/7	Inbound ← Anyone
6	Claire	Family support line	Inbound ← Family
7	Sam	Volunteer support line	Inbound ← Volunteers
8	Morgan	Buddy support line	Inbound ← Human buddies
9	Nova	Navigator assistant (internal only)	Inbound ← Navigators
10	Alex	Staff support line	Inbound ← All admin staff
11	Quinn	Concierge — 24/7 triage + Language Line bridge	Inbound ← Anyone
12	Jordan	Partner support line	Inbound ← B2B partners

Multilingual agents (Ming/Devi/Luna) deferred to Phase 55. See ThriveAtHome_AI_Agent_Architecture_Complete_v2.docx for all system prompts. Stub activation: see ThriveAtHome_Stub_Activation_Guide_v1.docx for all 15 stubs and 9 marketplace integrations.

Phase 55 — Full Multilingual UI « DEFERRED BY HUMAN DECISION — builds after production launch + first revenue. Multilingual agents (Ming/Devi/Luna) launch alongside this phase in order: Mandarin → Hindi → Spanish. - Moved per updated roadmap — builds only after the ENTIRE M19-M27 sequence is complete - M18 now ends at Phase 54 (Medicare Advantage Reporting API) - Language Line credentials still activate at Month 6 per Parallel Blitz (env var only, no code change — unrelated to the full i18n framework build) - Full i18n, next-intl, Spanish-first, multilingual Aria is the LAST feature built on the entire roadmap

Deferred — Activate When Ready

Feature	What's Needed	Est. Cost
M8 AI Calls (Aria)	RETELL_API_KEY, TWILIO_ACCOUNT_SID, TWILIO_AUTH_TOKEN, TWILIO_PHONE_NUMBER, ANTHROPIC_API_KEY	~\$0.05-0.11/min per call
M9 Concierge Line	Second Twilio number, RETELL_CONCIERGE_AGENT_ID, LANGUAGE_LINE credentials	~\$1.15/mo + per-minute
M10 Live SMS	TWILIO_ACCOUNT_SID, TWILIO_AUTH_TOKEN	~\$0.0079/SMS
M10 Live Email	SENDGRID_API_KEY, SENDGRID_FROM_EMAIL	Free up to 100/day
Companion payouts	Stripe Connect setup per companion	2.9% + 30¢ per transaction
Physical goods (Memory Book print)	Artifact Uprising API or similar	Per-order cost
Lyft Healthcare	Commercial partnership agreement	Per-ride
Instacart Business	Instacart developer program	Per-order
Teladoc	Healthcare provider agreement	Per-consultation

Known Issues / To Fix

These are issues identified during testing that need fixing:

1. **Volunteer name shows “James” instead of logged-in volunteer name** — query fetching wrong row, needs supabase_auth_id filter
2. **Connections stat card not scrolling to connections list** — anchor link needs fixing
3. **Service request volunteer dropdown empty** — needs active volunteers with matching service_types seeded
4. **Grief support trusted resources** — fixed (now clickable links) ✓
5. **Navigator “Contact member” wrong navigation** — fixed ✓
6. **Memory Collage not showing selected memories** — collage customization in progress
7. **Pricing page shows 3 plans** — needs Premier plan added, prices corrected to spec
8. **Events hydration error** — timezone mismatch in EventsClient.tsx
9. **Grief support referral card missing from confirmation screen** — in progress
10. **Service request items in navigator panel not clickable** — fixed ✓

Active Migrations (in order)

Migration	Tables Created	Status

Supabase Storage Buckets

Bucket	Access	Used For
member-documents	Private	Family document vault
life-story-attachments	Private	Life story photos and PDFs
memory-books	Private	Generated Memory Book PDFs

Edge Functions Deployed

Function	Purpose
push-notification	Realtime notifications to family dashboard
create-alert	Create alerts from external triggers
check-missed-calls	Detect and escalate missed check-in calls
family-nudge-check	Nudge family members who haven't logged in

Cron Jobs (vercel.json)

Endpoint	Schedule	Purpose
/api/cron/daily-calls	Every hour	Schedule daily

/api/cron/missed-calls	Every 30 min	check-in calls Detect missed calls
/api/cron/celebrations	Daily 8am	Birthday and milestone detection
/api/cron/milestones	Daily	Platform milestone recognition
/api/cron/grief- monitoring	Daily	Prolonged grief + anniversary detection
/api/cron/weekly- digest	Sundays 9am	Weekly family digest emails
/api/cron/monthly- summary	1st of month 9am	Monthly care summary

M20 — Community Organization Portal (Phases 63-66) 🚧 IN PROGRESS — Testing underway

M20 builds portals for four types of community organizations.
Revenue model: annual license fee per org (\$2,400-\$15,000/year).

Phase 63 — Village / Community Organization Portal 🚧 In progress — issues pending - community_orgs, org_programs, org_memberships, member_needs tables ✓ - Member needs bulletin board ✓ (member name dropdown bug still pending fix) - Annual membership dues with sliding-scale tiers ✓ - Org programs tracking ✓ (3 seeded programs confirmed: Friendly Visitor, Tech Help Tuesdays, Ride Share Network) - Email broadcast to org members 🚧 (limited recipient filtering — enhancement pending Phase 70) - Document library 🚧 (upload silently fails — Phase 72 bug fix pending) - Donations tracking 🚧 (Phase 69 — UI incomplete) - Bay Area Village Network seeded with 3 programs ✓ - /org-admin portal loads and routes correctly ✓ - Issues queued in progress.md: member UUID → name dropdown, membership fee config UI, document upload fix, email recipient filtering

Phase 64 — Area Agency on Aging Portal ✓ VERIFIED COMPLETE - area_agencies_on_aging, aaa_service_units, oaa_client_assessments tables ✓ - Multi-county management (SF/Marin/San Mateo) ✓ - Title III service category tracking (III-B/C1/C2/D/E) ✓ - NAPIS-compliant 17-column CSV export ✓ - OAA demographic fields ✓ - Bay Area AAA seeded (PSA-06) ✓ - /aaa-admin portal — all 4 tabs tested: Overview, Service Log, Counties, Reports ✓ - signed_by_name shows “Agency Admin” instead of actual name (minor issue logged)

Phase 65 — Senior Center Portal 🚧 In progress — testing underway - senior_centers, center_dropins, center_activities, activity_registrations, room_bookings, congregate_meals tables ✓ - SF Senior Center seeded (481 O’Farrell Street, capacity 150) ✓ - /senior-center-admin portal routes correctly ✓ - Testing in progress: drop-ins, activities, room bookings, meals, reports

Phase 66 — Network Federation 🚧 In progress — testing underway - network_accounts, network_dues tables ✓ - Village to Village Network + n4a seeded ✓ - Bay Area Village Network linked to VtVN

network ✓ - /network-admin portal routes correctly ✓ - Testing in progress: Overview, Member Organizations, Dues Billing, Aggregate Reports

Platform-Wide Additions — Phases 67-72 (build after M20 Phases 63-66, before M21)

These six phases apply to ALL GTM streams — B2C direct, employer benefits, agency white-label, village/community orgs, Medicare Advantage.

Build sequence: M20 (63-66) → Phases 67-72 → M21 → M22 → M23 → M24 → M25 → M26 → M27 → Phase 55 (Multilingual, LAST)

Phase	Feature	Status	Priority
Phase 67	Member Self-Service Portal — /member-portal, direct member login, post needs, view profile, life story	☐ Not built	HIGH
Phase 68	Volunteer 24/7 Self-Service Claiming — browse and claim open requests directly; urgent still requires navigator	 Partial	HIGH
Phase 69	Donations Management — donations table (migration 046), org admin UI, donor CSV export, “Donate” option	☐ Not built	MEDIUM
Phase 70	Email/Newsletter Broadcast — any admin sends to members/employees/clients; filtered subgroups; sent history	 Stub only	HIGH
Phase 71	Public Landing Pages — /chapter/[slug], /org/[slug], /employer/[slug] full SEO marketing pages	 Partial	HIGH
Phase 72	Document Library — upload/organise/share docs with role-based visibility; “platform-documents” Storage bucket	☐ Not built	MEDIUM

Competitive Spec Modifications — Phases 73-80 (from Competitive Analysis v2.0, June 2026)

Source: ThriveAtHome_Competitive_Analysis_v2_June2026.docx — 11 spec modifications, 8 not yet in build plan.

Build sequence: M20 (63-66) → Platform-Wide (67-72) →

Competitive Specs (73-80) → M21-M27 → Phase 55 (Multilingual, LAST)

Phase	Spec #	Feature	Priority	Competitive Reason
Phase 73	#1	Helpful Village Partnership API + Mon Ami Integration + Pricing Parity	● NOW	Mon Ami building competing org software — lock in Village orgs first. ALSO: add HV-competitive pricing tiers (In-Development \$49/mo, Growth \$149/mo, Scale \$349/mo), 30-day free trial, \$1,500 data migration service
Phase 74	#4	Employer Caregiver ROI Dashboard	● M 6-12	Homethrive won 2026 Lighthouse Award for measurable employer ROI
Phase 75	#5	Grief Welcome Path / 48-hour buddy SLA + hospice referrals	● M 6-12	Homethrive added loss support Feb 2026 — ThriveAtHome must differentiate by supporting the bereaved SENIOR directly, not just the family
Phase 76	#6	Medicare Advantage Outcomes Data Package	● URGENT	DUOS raised \$130M Oct 2025 targeting same MA plans — ThriveAtHome needs outcomes data now
Phase 77	#8	Agency Portal Companion Visit Tracking Upgrade	● NOW	Sensi.AI already selling to agencies ThriveAtHome needs as partners
Phase 78	#11	Agency Referral Partner Program	● NOW	10 agency partners = 500-2,000 members at near-zero CAC
Phase 79	#10	EHR / FHIR R4 Data Bridge for Hospital Referrals	● M 6-12	Zero-CAC acquisition channel via hospital discharge planners
Phase 80	#7	Competitor Comparison Landing Pages (SEO)	● Y2	Papa, GrandPad, DUOS, Homethrive comparison pages

Already in build plan (no new phase needed): - Spec #2 Gift subscription viral campaign — ✓ Phase 50b/50c/50d gift platform already built - Spec #3 Multilingual Aria voice personas — ✓ Phase 55

(Multilingual, built LAST) - Spec #9 Paid companion mobile app — ✓
Phase 48 (Paid Companion Marketplace) includes mobile app

Helpful Village feature parity gaps (confirmed June 2026): - ✓

Parity achieved: events, volunteer matching, member management basics - △ Gap: 24/7 volunteer self-service claiming (Phase 68) - △ Gap: Document library upload (Phase 72 — upload bug needs fix) - △ Gap: Email recipient filtering (Phase 70 — limited groups) - △ Gap: Public village website (Phase 71 — not full marketing page yet) - △ Gap: Pricing model — HV charges \$50/month for small/forming villages; ThriveAtHome needs equivalent In-Development tier (Phase 73) - △ Gap: 30-day free trial — HV offers this; ThriveAtHome must too (Phase 73) - △ Gap: Data migration service — needed for HV-to-ThriveAtHome conversions (Phase 73) - □ Minor gap: Zoom module (\$10/month in HV) — add Zoom calendar link field to events - □ Minor gap: SMS texting (\$6/month in HV) — available via Twilio once credentials added - □ Minor gap: Maps/geocoding (\$10/month in HV) — not yet built - ✗ ThriveAtHome WINS: Aria daily AI check-ins, family dashboard, Human Buddy, Communities, grief support, skill exchange, life story, services marketplace — none of these exist in HV at any price

Competitive context — key threats from v2 analysis: - **DUOS**

(\$130M raised Oct 2025) — building toward same MA channel. ThriveAtHome's response: move faster on outcomes data (Phase 76), lead with B2C moat DUOS doesn't have, compete on warmth + community vs DUOS's utilitarian benefit navigation - **Homethrive** **(\$64M raised)** — most direct employer channel competitor. Differentiation: ThriveAtHome reaches the SENIOR (Aria calls daily); Homethrive is family-only - **Sensi.AI (\$98M raised Oct 2025)** — courting same agencies ThriveAtHome needs. Pitch: "Sensi tells you what's wrong. ThriveAtHome keeps your clients engaged between visits" - **Mon Ami** — building competing org software for same nonprofits as M20 Village Portal. Must lock in Village orgs via Phase 73 before Mon Ami does - **Meela** — closest Aria analog but feature-only, no ecosystem. Potential acqui-hire candidate in Year 2

Full Vision Roadmap — M21-M27, Then Multilingual Last (from Comprehensive Specs)

These are genuine features in the original platform vision, now scheduled into the active build sequence after Phases 67–72. Build order: Phases 67–72 → M21 → M22 → M23 → M24 → M25 → M26 → M27 → **Phase 55 Full Multilingual UI (built LAST, after everything else).**

M21 — Expanded Volunteer Ecosystem (6 new categories)

- Retired Professionals Network — doctors, nurses, lawyers, CPAs, teachers, engineers, social workers, chefs volunteering expertise (health literacy circles, legal clinics, VITA tax help, tutoring, home safety tech assessments)
- Faith Community Chaplaincy Network — certified chaplain referrals for spiritual care, non-proselytizing, member-requested only

- Corporate Volunteer Program (3-tier: Community Partner 50-200hrs/yr, Champion 200-500hrs/yr, Leader 500+hrs/yr) with skills-based volunteering
- Neighbor Volunteers — same-zip-code members for informal check-ins and quick errands
- Family Volunteer Reciprocity Program — family members of one senior volunteer for other (unrelated) seniors, earning time credits
- Member Ambassador programme — experienced members welcome and guide new members
- Youth in Schools K-12 curriculum integration — elementary pen-pal letters, middle school “Life Stories” interview project, high school mentorship reversal
- Annual Intergenerational Showcase — student-produced life story collections shared at campus events

M22 — Device & Smart Home Integration Layer

- Companion Device — pre-configured Thrive Android tablet (\$99 one-time or \$15/month, free with 2yr+ commitment)
- Amazon Alexa Skills + Google Assistant Actions voice interface
- Smart home integration: Echo, Nest, Ring, ADT, Philips Hue, GrandPad
- Wearable integration: Apple HealthKit, Google Fit, Fitbit, Garmin
- Fall detection via wearable signal — emergency protocol within 60 seconds
- No-motion smart home anomaly detection
- HL7 FHIR / Epic / Cerner EHR connectors for clinical data exchange

M23 — Advanced AI/ML Layer

- Wellness baseline modeling (custom ML on 30-day wearable/sensor/check-in data)
- Behavioral anomaly detection (Isolation Forest time-series)
- Fall risk prediction (XGBoost on sensor + medication + history)
- Social isolation detection via sentiment NLP + engagement trend analysis (beyond Aria call-based detection)
- Grief pattern monitoring via sentiment NLP + behavioral anomaly detection (prolonged grief disorder risk flags)

M24 — Professional Services Revenue Layer

- Trusted Advisor Directory with paid annual listing fees (\$2,400-\$6,000/advisor) for elder law attorneys, financial advisors, benefits counselors
- VITA (Volunteer Income Tax Assistance) integration for free tax prep
- 988 Suicide & Crisis Lifeline + SAMHSA helpline explicit embedding throughout platform
- Document vault for advance directives, insurance cards, estate documents

M25 — Cultural Programming Depth

- Cultural festival calendars with specific dates (Lunar New Year, Diwali, Tết, Chuseok, Eid, etc.)
- Community Potluck Coordination — platform helps organize local in-person potluck dinners

- Cultural Story Circle — elders share homeland festival memories, recorded for life story archives
- Intergenerational Heritage Event — students learn traditions from elders for school projects
- Cultural Craft & Cooking Class — skill exchange tied to festival season (dumpling folding, diya painting)
- Oral history archive in native languages

M26 — Premium Subscription Add-Ons

- Caregiver Family Plan — \$89/month (1 senior + up to 5 family dashboard seats + monthly coordinator call)
- Long-Distance Caregiver Add-on — \$19/month (enhanced alerts, task management, video diary)
- Skill Exchange Premium — \$9/month (priority matching)
- Communities Premium — \$5/month
- Volunteer Concierge — \$19/month (premium matching)
- Annual Care Planning Session — \$149/session
- Benefits Maximizer Deep-Dive — \$79 one-time
- Milestone Birthday Memory Book physical (70th/75th/80th) — \$49 one-time, tied to age milestones specifically
- Extra annual legal consultation — \$75/consultation

M27 — Pet & Companion Life Tracking

- Pet profile in member record — proactive pet birthday/anniversary acknowledgment
- Pet milestone celebrations alongside human milestones
- Pet loss circle (distinct from human bereavement circles)

Geographic Chapter Model

ThriveAtHome uses a hybrid chapter system — national open platform with soft local chapters:

Concept	How It Works
Open enrollment	Any member can enroll anywhere in the US immediately
Metro area grouping	Members auto-assigned to metro area by zip code
Soft chapter	Every metro area is a soft chapter from day one
Official chapter	When metro area reaches 50+ active members → activate as official ThriveAtHome Chapter with local coordinator
Volunteer priority	Same chapter +30 pts, adjacent metro +15 pts, national virtual +0 pts
Events	Local chapter events shown with “Near you” badge; virtual events always available nationwide
Services	In-person services filtered by distance radius; phone/video available nationally
Rural members	Full virtual service always available — no degraded experience

New database tables needed (Phase 50f): - metro_areas — id, chapter_name, city, state, zip_prefixes (text[]), is_active_chapter, chapter_coordinator_id - Add chapter_id and metro_area columns to members table

Launch sequence: 1. Start in Bay Area — build first 50 members there 2. Activate Bay Area as first official ThriveAtHome Chapter 3. Expand to Chicago, New York, LA once Bay Area model proven 4. Rural/small-town members enrolled nationally on virtual service from day one

The Three Core Roles — Architecture

Every feature in the platform maps to one of three roles. This distinction must be maintained across all UI, copy, and feature development:

Role	Type	Purpose	Plans
Aria	AI	Daily structured check-ins, wellness data, alerts, celebrations	All plans
Human Buddy	Human relationship	Assigned person, regular calls/visits, relationship-focused, remembers what matters	Connect, Complete, Premier
Navigator	Human admin/care	Caseload management, crisis response, service dispatch, care coordination	Complete + Premier (shared pool for Basics/Connect urgent only)

Human Buddy Feature — Build Requirements

The Human Buddy is a distinct feature that needs to be clearly represented in the platform:

Database: Add buddy_assignments table: id, member_id, buddy_type (volunteer/paid_companion), volunteer_id or companion_id, assigned_at, check_in_frequency (twice_monthly/weekly/on_demand), status (active/paused/ended), notes

Family dashboard: Add “Your Buddy” card showing: buddy’s first name, photo (optional), last contact date, next scheduled contact, a message from the buddy if they left one

Volunteer dashboard: Add “My buddy connections” section — different from general volunteer visits. Buddy connections are ongoing relationships, not one-off visits. Show: member name, how long connected, last contact, next scheduled contact, “Log a buddy check-in” button

Navigator console: Show buddy assignment status for each member — assigned/unassigned. Unassigned members on Connect+ plans flagged for buddy matching. Navigator can reassign buddies when

needed

Onboarding: Step 4 plan selection cards updated to clearly show Human Buddy as a key differentiator between Basics and Connect plans

Plan gating: Buddy features (browse buddies, request a buddy, buddy messaging) only visible on Connect, Complete, and Premier plans. Basics plan shows locked state with upgrade prompt

Corporate Structure (from Corporate Structure v1.0 doc)

Entity: Delaware C-Corp with Public Benefit Corporation (PBC) designation. Not an LLC. **B Corp:** Start certification Month 3–4. ~\$2K–\$5K. Recertify every 3 years. **Foundation:** ThriveAtHome Foundation (501c3) in Year 2–3 when ARR >\$500K. 1% revenue model. **Equity:** 10M founder shares, 4-year vest, 1-year cliff, 83(b) election within 30 days, 10–15% ESOP. **Fundraising:** SAFE note pre-seed. Impact investors: Pivotal Ventures, a16z Bio Fund, Obvious Ventures, AARP Foundation.

Aria Design Rules (from Aria Research v4 doc)

Never say: “monitoring”, “wellness check”, “safety call”, “check-up”, “assessment” **Always say:** “morning catch-up”, “friendly call”, “daily chat”, “Aria’s call” **Adaptive frequency:** daily (default), 3x/week (opt-down), weekly (resistant seniors) **Third call:** Aria offers frequency choice explicitly **First call:** Aria says “Our conversations are private. Your family only sees a friendly summary.” **Context recall:** Reference previous conversations from first week — primary retention mechanism **Family dashboard:** Shows AI summary ONLY — never the raw transcript

Buddy Programme Phases (from Buddy Build Spec v1.0 doc)

Phases 33a–33f insert between Phase 33 (Volunteer Portal) and Phase 34 (Grief Support):

Phase	Name	Status
33a	Buddy database layer (buddy_assignments, buddy_calls tables)	✓ Complete — migration 054_buddy_programme.sql confirmed
33b	Buddy assignment system + admin matching UI	✓ Complete — /admin/buddy-matching page built and tested
33c	Buddy portal — pre-call brief + call logging	⚠ Partial — “My Buddies” tab missing from volunteer dashboard (fix queued)

33d	Navigator buddy management tools	⚠ Partial — buddy panel missing from navigator member detail (fix queued)
33e	Family dashboard buddy integration	⚠ Partial — buddy card not showing for Connect+ plans (fix queued)
33f	Onboarding buddy matching questions (5 questions, Connect+ only)	✓ Complete — buddy matching questions added to onboarding

Corrected plan tiers: - Connect \$39: Volunteer buddy, weekly calls - Complete \$69: Volunteer buddy, weekly calls - Premier \$129: Buddy bi-weekly + priority matching (within 48 hrs)

Launch Strategy (from Strategy v4 doc — Parallel Blitz)

Strategy D — Parallel Blitz is the recommended launch strategy: Launch B2C subscriptions + free Communities (cultural heritage + interest circles) + MSW university partnerships simultaneously from Month 1. Aria calls must be live Week 1 — not deferred.

Delivery partner go-live schedule: - Month 3: Meals on Wheels (free) - Month 6: GoGoGrandparent, Instacart Business - Month 9: Lyft Healthcare, Angi/TaskRabbit - Month 12: Teladoc/MDLive

Key Design Decisions Made During Build

1. **“Cultural Circles” renamed to “Communities”** — URL /dashboard/cultural-circles redirects to /dashboard/communities. Database table stays as cultural_circles.
2. **20 total communities** — 12 cultural/ethnic + 8 interest-based. Admin can add more via /admin/communities.
3. **Build order changed** — M17 Services Marketplace moved up before M15/M16 for user value. M11 Billing moved up early.
4. **Stub providers** — all paid services (AI, SMS, email, transport, meals) use stubs until credentials added. providers.ts auto-switches to real implementation when env var is set.
5. **Memory Book two formats** — PDF book (multi-page narrative) + Collage (single-page frameable). Both use @react-pdf/renderer.
6. **Gift subscriptions** — /gift page, gift_subscriptions table, supports 1/3/6/12 month gifts.
7. **Volunteer driver verification** — has_drivers_license, license_state, insurance_provider, insurance_expiry columns added for transport volunteers.
8. **Navigator console redesign** — unified action feed showing all pending items across all members, not just a caseload table.
9. **Services dispatch inline** — navigator can dispatch, assign volunteers, and update status without leaving the member detail panel.
10. **HIPAA BAAs pending** — must be signed before real senior health data enters system. Platform is ready but BAAs with Supabase, Twilio, Retell AI, Anthropic, SendGrid not yet signed.

Document version: 4.0 — Updated June 2026 to reflect actual build state Previous versions: v1.0 (initial spec), v2.0 (48-phase granular), v3.0 (64-phase full spec)
