

THRIVEATHOME — COMPREHENSIVE PLATFORM SPECIFICATION

Architecture, Vision, Build Status & Monetization — Master Edition

**Version 5.0 — June 2026 — Supersedes all prior
specification documents**

This is the single authoritative ThriveAtHome reference document. It contains everything from the original Comprehensive Specs vision (May 2025) PLUS every feature, decision, and addition made since (June 2026). Nothing from the original vision has been removed. Nothing built since has been lost. Status tags show what is ✓ Built, 🔄 In Progress, ☐ Not Started, or ⏸ Deferred.

1. VISION & MISSION

ThriveAtHome is a comprehensive digital and human-services platform designed to help adults aged 65 and older live with confidence, safety, purpose, and connection in their own homes — for as long as they choose. It bridges AI-powered intelligence with warm human relationships, volunteer community networks, paid companion services, intergenerational student programs, skill exchange economies, and proactive family engagement.

Target Users	Core Promise	Launch Markets	Version
Adults 65+ living at home	Independence with community & care	US metros + rural (Bay Area chapter first)	Master Edition — June 2026

1.1 The Problem We Solve

Challenge	Current Reality	ThriveAtHome Solution
Isolation & Loneliness	40% of seniors report chronic loneliness	Daily AI check-ins, peer connection, volunteer visits, interest groups, Human Buddy programme Smart monitoring

Safety at Home	Every 11 seconds a senior visits ER for a fall	(roadmap), fall detection (roadmap), 24/7 concierge line, medication reminders
Family Anxiety	Adult children live avg. 400 miles from parents	Proactive family dashboards, real-time health nudges, weekly digests
Care Coordination	Seniors navigate 6+ providers with no coordinator	AI care concierge + human navigator + care coordination team on-call
Cognitive Decline	62M+ seniors face mild cognitive impairment	Cognitive engagement tools, skill exchange, early warning alerts
Access to Services	Many seniors unaware of benefits they qualify for	Benefits navigator, volunteer matching, paid companion marketplace, service directory
Purposelessness	Retirement can rob seniors of identity and contribution	Skill exchange lets seniors teach others; student network brings intergenerational meaning
Nutrition & Meals	25%+ seniors face food insecurity or poor nutrition	Meal delivery, nutrition plans, social dining events coordinated through platform
Family Connection Gaps	Families miss occasions, lose touch with senior's life events	Family Events Calendar, senior gift-giving, celebration coordination, Aria proactive reminders
Financial Exploitation	Seniors are the most targeted demographic for fraud	Aria scam detection, fraud_flags system, large purchase alerts, never background-checks members

1.2 Core Principles

- AI augments — never replaces — human connection and judgment
- Dignity first: seniors are contributors and teachers, not just recipients of care
- Family is looped in proactively, not reactively
- Community volunteers, paid companions, students, and an assigned human Buddy are core to the ecosystem
- Skill exchange recognizes seniors' wisdom as an asset to be shared
- Cultural identity and belonging are foundational to wellbeing
- Grief and life transitions are met with compassionate, sustained

- support
 - Accessibility and simplicity are non-negotiable for UX
 - Privacy, data ethics, and trust are foundational
 - **ThriveAtHome is a consumer brand first** — families trust ThriveAtHome; partners use ThriveAtHome; the brand always belongs to ThriveAtHome
 - Members are never background-checked — only volunteers, companions, and navigators are
 - Age verification is soft (date of birth) — dignity over surveillance
-

2. PLATFORM ARCHITECTURE — FIVE-LAYER MODEL

ThriveAtHome is built as a modular, cloud-native platform organized into five integrated service layers feeding a central member data hub. Each layer is independently scalable while sharing context through the unified member profile.

2.1 Five-Layer Architecture — Detail

LAYER 1 — AI CONNECTION & SUPPORT

Component	Function	Status	Technology
Check-In Calls	Daily/adaptive outbound AI voice calls (Aria)	⏏ Built, deferred until credentials added	Retell AI + Twilio + Anthropic
Concierge Line	24/7 inbound phone line — seniors call for anything	⏏ Deferred (M9)	AI triage + human escalation
Family Updates	Post-call summaries + wellness signals sent to family	✔ Built	LLM summarization
Alerts Engine	Missed call flags, wellness drift detection, crisis routing	✔ Built	Behavioral rule-based thresholds
Adaptive Call Frequency	Daily (default) / 3x-week / weekly options	✔ Designed, ⏏ activates with Aria	Member/family/navigator configurable

Aria language rules (evidence-based): Never say “monitoring,” “wellness check,” “safety call,” “check-up,” “assessment.” Always say “morning catch-up,” “friendly call,” “daily chat,” “Aria’s call.” First call: “Our conversations are private. Your family only sees a friendly summary — not a recording or transcript.” Average call length target: 15 minutes.

LAYER 2 — HUMAN COMPANION NETWORK

Component	Function	Status	Model
Volunteers	Vetted community companions for phone + in-person visits	✓ Built (M13)	Free — matched on interests, location, sub-type
Human Buddy Programme	Assigned relationship-focused person — distinct from Aria (AI) and Navigator (admin)	🔧 In progress (Phases 33a–33f)	Connect: weekly volunteer buddy; Complete: weekly volunteer buddy; Premie bi-weekly + priority companion buddy
Paid Companions	Errand escorts, event attendance, social visits	🔧 In progress (Phase 48)	Marketplace: \$15–\$25/h; platform takes 20% fee
Student Network	Intergenerational service-hours program	✓ Built (M13)	University partnership; students earn credit hours
Corporate Volunteer Program	Employee volunteer hours tracked/exported for employer’s CSR matching programs	🔧 In progress (Phase 50l, moved up from M21)	Benevity/YourCause/Brig Funds-compatible CSV export
Care Coordination (Navigators)	Case managers, appointment escorts, crisis support	✓ Built (M7)	Staff + contracted navigators

The Three Core Roles (clear delineation, must never blur in UI/copy):

Role	Type	Purpose	Plans	Caseload
Aria	AI	Daily structured check-ins, wellness data, alerts, celebrations	All plans	Unlimited — 100K+ at same cost
Human Buddy	Human relationship	Assigned person, regular calls/visits, remembers what matters, relationship-focused	Connect, Complete, Premier	3-5 seniors per buddy
Navigator	Human admin/care	Caseload management, crisis response, service dispatch	Complete + Premier (shared pool Basics/Connect, urgent only)	Up to 150 members

The boundary that must never blur: a buddy who hears something concerning logs it and escalates to the navigator. The buddy's job is the relationship. The navigator's job is the response.

LAYER 3 — COMMUNITY & EVENTS

Component	Function	Status	Format	Key
Virtual Events	Phone-joinable + video group experiences	✓ Built (M14)	Book clubs, music, trivia, etc.	Dial-in smartp require
Local Events	In-person community gatherings at vetted venues	🔧 Partial	Libraries, cafés, parks, faith spaces	Transp coordin in
Skill Exchange	Seniors teach skills to other seniors and community members	✓ Built (M14)	Time banking — teach 1hr, earn 1hr credit	Cookin history, garden wisdom
Interest Groups (Communities — Interest & Hobby)	Persistent, member-led recurring groups	✓ Built (M14) — 8 circles seeded: Gardening, Books, Music, Cooking, Faith, Sports, Travel,	Weekly cadence; self-organizing with platform facilitation	Vision original named LGBTQ widows support profess identity distinct groups built as

		Crafts		circles
	12 dedicated sub-communities by ethnic/cultural heritage — Latino/Hispanic, Chinese-American, Vietnamese, Korean, South Asian, Filipino, African-American, Jewish, Arab/Middle Eastern, Caribbean, Eastern European, Native American			
Communities — Cultural & Heritage (formerly “Cultural Circles”)		✓ Built (M14) — all 12 seeded	Language, content, festivals, matching	Member platform
Communities (unified name)	Combines Cultural + Interest circles under one feature	✓ Built	20 total communities at launch	Admin more v. /admin,
Geographic Chapters	Hybrid national + soft local chapter model	🔄 In progress (Phase 50f)	metro_areas table, 10 US metros seeded	Bay Area chapter activated, member

LAYER 4 — SERVICES MARKETPLACE

Component	Function	Status	Partners/Method	Impact
Transport	Rides to appointments, errands, events	✓ Built (Phase 45)	Lyft Healthcare (deferred), volunteer drivers	Pe 10 rel co.
Home Services	Repair, cleaning, grocery delivery, tech help	🔄 In progress (Phase 46)	Vetted local providers, service_providers table	Le fee 18 co.
Health Services	Care navigation, medication reminders, telehealth links	☐ Not started (Phase 47)	Teladoc, MDLive (deferred)	Re + su
Legal / Financial	Estate planning, benefits access,	☐ Not started (Phase	Elder law firms, financial advisors	Re ad dir lis

	trusted advisors	47)		(vi
Meals	Meal delivery, nutrition plans, social dining events	In progress (Phase 46)	Meals on Wheels (Month 3), Instacart (Month 6)	Pe co.
Tech Help	In-home tech assistance, scam education	☐ Not started (Phase 49)	Volunteers, students, paid specialists	Tie he vo vis co.
Companionship & Social	Walking companion, friendly visits, phone friendship	Built (7th service category)	Volunteer-matched	Fr su
Travel Assistance	Flight/hotel booking help, accessible travel research	In progress (8th service category)	Navigator-coordinated, volunteer travel companions	Fr co.
Important Dates & Renewals (supersedes Prescription Refill Mgmt)	Member-configurable tracking for prescriptions, insurance, licenses, registrations, AAA, passport, gym, appointments — with document upload	In progress (Phase 50j, replaces 50a)	Stub: NimbleRx, PillPack for prescriptions specifically	Fr na co.

Important Dates & Renewals — Full Detail:

A single flexible system replaces the original narrow Prescription Refill Management feature. Members or family can add any date-based item they want tracked, choosing from 11 preset types or “Other” for full flexibility:

Prescription · Home Insurance · Car Insurance · Health Insurance · Driver’s License · Car Registration · AAA Membership · Passport · Gym Membership · Appointment · Other

Each tracked item supports: - Custom name (e.g. “Honda Civic registration,” “Dr. Smith annual physical”) - Expiration or appointment date - Reminder lead time — sensible defaults per type (5 days for prescriptions, 30 days for insurance/registration/license, 14 days for AAA, 90 days for passport, 1 day plus an optional 7-day reminder for appointments) — fully editable per item - Recurrence cycle — prescriptions renew every 28 days, insurance/registration/license/AAA every 365 days, passport is one-time — all overridable - Renewal

contact info (phone or website) if known - **Document upload** — photograph or PDF of the insurance card, registration, or appointment confirmation, stored securely per item

How it works: Aria proactively mentions upcoming items during regular check-in calls, the same warm way she mentions family events — “I wanted to remind you that your car registration is coming up on the 15th.” The member or family can then choose: snooze the reminder, ask the navigator to help renew it, mark it already handled (which automatically advances recurring items to their next cycle), or — for appointments — reschedule or cancel through the navigator. This turns a single-purpose prescription reminder into a complete life-administration safety net for the senior, with the navigator standing by to actually help when asked.

LAYER 5 — CELEBRATIONS, CULTURE & TRANSITIONS

Component	Function	Status	Format	Key Del
Personalized Celebrations	Birthdays, milestones — customized, family-coordinated	✓ Built (M15)	7-day arc, gold banner, milestone recognition	celebration_table
Life Story Archive	Personal history preservation	✓ Built (M15)	7 entry types incl. First Memory, era grouping	Photo/PDF attachments
Memory Book / Collage	Keepsake document generation	✓ Built (M15)	PDF (multi-page) + Collage (12x12 frameable)	@react-pdf/rendered Shutterfly-q
Cultural Community Circles	Ethnic-specific communities, festival programming	✓ Built (M14)	12 circles	See Section full detail
Grief & Life Transition Support	Bereavement, transitions, diagnosis support	✓ Built (M16)	Navigator-led; 4 + 5 pathway cards	Anniversary sensitivity, professional referral
Family-Initiated Celebrations	Family requests special occasion coordination	🔧 In progress (Phase 50c)	3 tiers: Digital (free) / Enhanced (\$25) / Premier (\$75)	Family coordination
Family Events Calendar & Gift-Giving	Aria reminds senior of family occasions; senior sends gifts	🔧 In progress (Phase 50d)	family_events table	Birthdays, anniversaries, graduations, travel, new
Gift Sending	Member-to-family and family-to-	🔧 In progress	Flowers, food, gift	15% platfor

Platform	member gift coordination	(Phase 50b)	cards, cards, baskets	commission
-----------------	--------------------------	-------------	-----------------------	------------

2.2 Central Member Profile & Data Hub

Data Domain	What Is Stored	Who Uses It	Privacy Control
Call History & Transcripts	AI check-in recordings, summaries	Care team; family sees SUMMARY ONLY, never transcript	Senior controls family access level
Connection History	Volunteer visits, buddy calls, companion bookings, student interactions	Matching engine, care coordinators	Private; aggregate stats shared with family
Service History	Transport, home services, meals, health appointments	Care coordinators, family dashboard	Senior-controlled sharing
Wellness Signals	Mood trends, activity, medication adherence, alert history	Family dashboard, care team	Granular consent per data type
Community Engagement	Events attended, groups joined, skills taught/learned	Engagement AI, family highlights feed	Senior can hide from family if preferred
Celebrations & Milestones	Birthday arcs, achievement celebrations	Family, AI personalization	Member controls public vs private per milestone
Grief & Transition Records	Loss events, transition support progress	Navigator, care team only — not shared with family without consent	Highest privacy tier
Buddy Call Records	Buddy notes, concern flags, family notes, milestone flags	Navigator sees everything; family sees buddy_notes + family_note ONLY	concern_description is navigator-only — family NEVER sees this field
Preferences & Profile	Communication style, interests, routine, dietary needs, language, cultural	All layers	Senior editable at any time

Fraud Flags	background		
	Scam detection flags, large purchase alerts	Navigator, family	Visible to family for protection, not punitive

3. TECHNOLOGY STACK

3.1 Frontend & Interfaces (Built / Active)

- Family Web App: Next.js 16 + Tailwind CSS v4 + TypeScript progressive web app — ✓ Built
- Senior App: React Native (iOS/Android) — ☐ Vision, not yet built (current platform is phone-call-first, no app required)
- Voice Interface: Amazon Alexa Skills + Google Assistant Actions — ☐ Roadmap (M22)
- Companion Device: Pre-configured Android tablet — ☐ Roadmap (M22), \$99 one-time or \$15/month
- Dial-In Access: Twilio-powered phone number — " Built, deferred until Twilio credentials added
- Volunteer / Companion / Buddy Portal: Web dashboard — ✓ Built
- Care Coordinator (Navigator) Console: Unified action feed — ✓ Built, redesigned from original caseload-table concept
- Communities Platform (formerly Cultural Circles): 20 community spaces at /dashboard/communities — ✓ Built (English UI; full i18n is Phase 55, builds LAST after M27)

3.2 AI & Intelligence Engine

AI Capability	Technology	Status	Data Inputs	Outputs
Voice Check-In Agent (Aria)	Retell AI + Anthropic Claude	" Built, deferred	Senior voice, prior call history	Structured wellness mood score alert flags
Concierge Line Triage	LLM routing	" Deferred (M9)	Inbound call transcript	Service dispatch human transfer
Wellness Baseline Modeling	Custom ML	☐ Roadmap (M23)	30-day check-in/sensor data	Personalized anomaly thresholds
Behavioral Anomaly Detection	Time-series (Isolation Forest)	☐ Roadmap (M23)	Behavioral baseline vs current	Alert triggers
Family Summary Generation	Anthropic Claude	✓ Built	Call transcripts, platform events	Plain-language digest
Volunteer & Buddy Matching	Constraint scoring algorithm	✓ Built	Interests, location, language, sub-	Match scores (+20 citizenship, +15/interest, +20 language)

			type	+10 available
Skill Exchange Matching	Interest graph + time bank ledger	✓ Built	Skills offered/wanted	Recommend exchange
Fall Risk Prediction	Gradient boosting	□ Roadmap (M23)	Sensor, medication, history	Risk score
Social Isolation Detection (NLP-based)	Sentiment NLP	□ Roadmap (M23) — currently rule-based (7 consecutive calls no social mention)	Check-in sentiment, attendance	Outreach triggers
Benefits Discovery Engine	Rules engine	✓ Built (15+ programs)	Zip, income, conditions	Ranked benefits
Celebration Personalization	LLM + life story data	✓ Built	Life story entries, preferences	Personalized celebration messages
Grief Pattern Monitoring	Sentiment NLP + behavioral	✓ Built (rule-based version)	Check-in sentiment, isolation signals	Prolonged grief risk
Fraud / Scam Detection	Pattern matching on call transcripts and messages	🔄 In progress (Phase 50g)	Call transcripts, messages	fraud, gift card, romance, scams, support, scams, scams
Buddy Pre-Call Brief Generator	Anthropic Claude (claude-sonnet-4, max 200 tokens)	🔄 In progress (Phase 33a)	Last 2 Aria call summaries	Warm 2 sentences for buddy before 1st call

3.3 Backend, Data & Integrations

- Core API: Next.js API routes + Supabase Edge Functions — ✓ Built
- Database: Supabase (PostgreSQL) — ✓ Built, 45+ tables, RLS policies, audit logging
- Real-time: Supabase Realtime + Edge Functions — ✓ Built
- File/Media: Supabase Storage — ✓ Built (member-documents, life-story-attachments, memory-books buckets)
- Phone Infrastructure: Twilio Programmable Voice — ⏸ Built, deferred
- i18n Framework: □ Roadmap (Phase 55, builds LAST after M19-M27 complete) — currently English-only UI

Key Integration Partners — Status

Category	Integrations	Status
AI & Voice	Retell AI, Anthropic Claude, Twilio	» Built, deferred until credentials
Email	SendGrid	» Built, deferred
Background Checks	Checkr	» Built, deferred
Payments	Stripe	✓ Built (subscriptions, gifts); Stripe Connect for companions 🔄 in progress
Transportation	Lyft Healthcare, GoGoGrandparent	☐ Not started — Month 6/9 target per Parallel Blitz
Meals & Groceries	Meals on Wheels, Instacart Business	☐ Not started — Month 3/6 target
Telehealth	Teladoc, MDLive	☐ Not started — Month 12 target
Language Access	Language Line Solutions	☐ Not started — Month 6 target
Physical Goods	Artifact Uprising, 1-800-Flowers, Goldbelly	☐ Not started — Month 6 target
Health (Smart Home/Wearables)	Apple HealthKit, Fitbit, Garmin, Echo, Nest, Ring	☐ Roadmap (M22) — not in near-term plan
Education	Handshake, x2VOL, Track it Forward	🔄 Handshake Month 1; others roadmap (Phase 56)
Volunteer Management	Checkr	» Deferred

3.4 Security & Compliance

- HIPAA-compliant infrastructure — ✓ Architecture ready; BAAs ☐ pending signature (Supabase, Twilio, Retell AI, Anthropic, SendGrid)
- SOC 2 Type II — ☐ Not started; Type I targeted to begin Month 10-11 per Strategy v4
- WCAG 2.1 AA accessibility — ✓ Built and audited
- End-to-end encryption for health data — ✓ Built via Supabase
- Role-based access control — ✓ Built (family, navigator, admin, volunteer, student, employer_admin, agency_admin roles)
- AI audit trails — ✓ Built (audit_log table)
- Grief and transition data: highest privacy tier — ✓ Built, navigator-only by default
- **Buddy concern_description: navigator-only, never shown to family** — ✓ Designed (Phase 33a)
- **Fraud flags visible to family** (different from grief data — these protect, not restrict) — 🔄 In progress

4. PRODUCT FEATURES & SPECIFICATIONS

4.1 Layer 1: AI Connection & Support

A. Daily AI Check-In Calls (Aria)

- Outbound AI voice call at senior's preferred time — ☒ built, deferred until Retell AI/Twilio credentials added
- Adaptive frequency: daily (default) / 3x-week (opt-down) / weekly (resistant seniors) — third call offers explicit choice
- Covers: mood, energy, pain, sleep, activity, medication, social connection, appetite
- Multilingual: Spanish + Mandarin priority Phase 1 — ☐ not yet built (English only currently)
- References prior conversations from the first week — primary retention mechanism
- Senior can skip any day without penalty

B. 24/7 Concierge Phone Line

- ☒ Deferred (M9) — dedicated inbound number, AI triage, human escalation within 2 minutes

C. Family Updates & Reporting

- ☒ Built: weekly digest, post-call summaries, real-time alerts, monthly care summary, milestone celebrations, health timeline
- **AI summary only — never the raw transcript** (trust design + HIPAA)

D. Alerts & Escalation Engine

- ☒ Built: tiered system (informational → concern → urgent → emergency)
- Missed call: 1 = nudge, 2 consecutive = navigator call, 3 = welfare check protocol
- Wellness drift: 7-day declining trend → care team review
- Crisis language detection: zero AI-only response, immediate human escalation
- Grief monitoring: prolonged grief signals flagged

4.2 Layer 2: Human Companion Network

A. Volunteer Program — ☒ Built (M13)

- Application, Checkr background check (deferred until activated), training modules (vision: 4hrs online, not yet built as formal LMS)
- Smart matching on location, interests, sub-type, language, availability
- 20+ specific service sub-types (medical_transport, grocery_transport, house_cleaning, meal_delivery, smartphone_help, friendly_visit, etc.)

- Impact tracking, visit logging, PDF service record download

B. Human Buddy Programme — 🔄 In progress (Phases 33a-33f, NEW since original vision)

- Distinct from Aria (AI) and Navigator (admin) — the relationship layer
- Plan tiers: Basics = no buddy; Connect/Complete = weekly volunteer buddy; Premier = bi-weekly + priority companion buddy
- 5 onboarding matching questions for Connect+ members (topics, era, call length, intro note, preferences)
- Matching score: +20 same city, +15/shared interest (max 45), +20 language, +10 availability, -10 at capacity
- Pre-call brief generated by Claude from last 2 Aria summaries
- Post-call logging: duration, quality, notes, optional family note, optional concern flag, milestone marking
- Graceful transitions: “ending” status, two-call handoff with new buddy
- **Critical rule: buddy logs and escalates concerns — never acts alone. Navigator responds.**

C. Paid Companion Marketplace — 🔄 In progress (Phase 48)

- Vetted workers, background checked, insured, rated
- \$15-\$25/hr; platform takes 20% fee
- Requires Stripe Connect (not yet activated — build when first real companion ready to onboard)
- **Distinct from free Companionship & Social service request** — paid marketplace is for dedicated/high-commitment companionship (travel, hospital stays, special occasions); free volunteer match is for regular casual connection

D. Student Network — ✓ Built (M13)

- University partnerships, service hours tracking, PDF service records
- Annual partnership fee vision: \$5,000-\$20,000/campus
- ☐ Roadmap: Annual Intergenerational Showcase not yet built

E. Care Coordination (Navigators) — ✓ Built (M7), redesigned

- Unified action feed (redesigned from original caseload-table concept) — shows all pending items across all members prioritized by urgency
- Service dispatch panel: inline assignment, reassign, reschedule, cancel with reason
- Vision ratio: 1:150 standard, 1:50 Premier

4.3 Layer 3: Community & Events

A. Virtual Events — ✓ Built (M14)

- Phone-dial-in + video, no smartphone required

- Platform-wide events visible to all members
- External events discovery (Meetup, Eventbrite, Luma placeholders)

B. Local In-Person Events — 🌀 Partial

- Location field built; full venue curation and transport-in-single-booking not yet built

C. Skill Exchange (Time Banking) — ✔ Built (M14)

- Register skills, time credit ledger, automatic transfer on completion
- Family dashboard highlight: “[Senior] taught her first cooking class!”

D. Interest Groups / Communities — ✔ Built (M14)

- **8 interest circles built:** Gardening, Books, Music, Cooking, Faith, Sports, Travel, Crafts
- **Vision gap — not yet built as named circles:** veterans support group, LGBTQ+ seniors group, widows/widowers support group, professional identity groups (these were named in the original spec’s Interest Groups section and should be considered for addition)
- Admin can create new communities at /admin/communities

E. Cultural Community Circles — ✔ Built (M14), see Section 6 for full detail

F. Geographic Chapters — 🌀 In progress (Phase 50f, NEW since original vision)

- Hybrid model: national open enrollment + soft local chapters
- 10 US metros seeded (Bay Area, LA, Chicago, NY, Houston, Phoenix, Philadelphia, San Antonio, Dallas, Seattle)
- Auto-activates as official chapter at 50+ members with local coordinator
- Volunteer/buddy matching prioritizes same chapter (+30) then same state (+15)
- Rural members get full virtual service — no degraded experience

4.4 Layer 4: Services Marketplace

7 service categories built (8th — Travel — in progress):

Category	Status	Sub-types
Transport	✔ Built (Phase 45)	Medical, grocery, social, religious, PT, other
Home Services	🌀 In progress (Phase 46)	Cleaning, laundry, yard, safety assessment, repairs, decluttering

Meals & Nutrition	 In progress (Phase 46)	Delivery, grocery shopping, cooking assistance, meal planning
Health Services	☐ Not started (Phase 47)	Telehealth, medication review, mental health, PT coordination, hospice referral
Legal & Financial	☐ Not started (Phase 47)	Elder law, estate planning, financial advisor, benefits counseling, fraud assistance
Tech Help	☐ Not started (Phase 49)	Smartphone, computer, video calling, WiFi, scam prevention, TV/streaming
Companionship & Social	 Built	Walking companion, friendly visit, phone friendship, event escort, reading companion
Travel Assistance (8th, NEW)	 In progress	Flight booking, hotel research, airport transport, accessible travel, itinerary planning, travel companion, insurance guidance
Roadside Assistance & Car Repair (9th, NEW)	 In progress (Phase 50k)	Flat tyre, battery jump, lockout, towing, fuel delivery, minor repair, mechanic referral. Pre-fills from member's AAA membership or car insurance stored in Important Dates & Renewals. Urgent flag bypasses standard queue for roadside emergencies.

All categories use a single source-of-truth SERVICE_TYPES constant — every sub-type, label, icon, and matched volunteer skill is defined once and propagated everywhere (volunteer application, matching, navigator dispatch, family dashboard, all portals).

4.5 Layer 5: Celebrations, Culture & Transitions

See Sections 5, 6, 7 for full detail on each component.

5. PERSONALIZED CELEBRATIONS LAYER

5.1 Birthday Celebrations — ✓ Built (M15), 🛠 Enhancements in progress

Built today:

- Birthday detection cron (D-7 family notification, D-0 dashboard gold banner)
- Milestone recognition: First Check-In, 30-Day Streak

Vision elements not yet built:

- 7-day celebration arc (currently single-day detection, not full week-long arc)
- Community feed post with hearts/voice messages from other members
- Birthday virtual gathering room
- Volunteer special visit coordination tied specifically to birthday
- Birthday meal delivery from partner restaurant
- Milestone Birthday Special Programs table (70th: life story video; 75th: memory book + special navigator call; 80th: professional phone interview audio recording; 85th/90th/95th/100th: full platform celebration with community toast, governor/mayor letter facilitation)

NEW since original vision — Family-Initiated Celebrations (Phase 50c):

- Family requests special occasions (Birthday, Anniversary, Homecoming, Recovery Milestone, Holiday) directly from /dashboard/celebrations
- **Three coordination tiers:** Digital (free — personalized Aria call using life story entries + digital family card) / Enhanced (\$25 — + volunteer visit + gift coordination) / Premier (\$75 — + navigator-coordinated video family gathering + physical memory book)
- Family coordination room for all linked family members
- Navigator handles Enhanced and Premier logistics

5.2 Anniversaries & Relationship Milestones

- ✓ Built: wedding anniversary, widowhood anniversary detection via grief module's anniversary sensitivity
- ☐ Not yet built: friendship anniversaries, pet milestones (roadmap M27)

5.3 Personal Achievement Celebrations

- ✓ Partial: 30-day streak badge built
- ☐ Not yet built: full achievement table (skill-taught-first-time)

highlights, 1-year platform anniversary card, “returned home from hospital” welcome flow, major life document completion acknowledgment)

5.4 Family Events Calendar & Senior Gift-Giving — 🔄 In progress (Phase 50d, NEW since original vision)

- family_events table: birthdays, anniversaries, graduations, travel, parties, holidays, new babies
- Aria mentions upcoming family events naturally in check-in calls (7 days before and day-of)
- Senior can send gift to family member via platform (Gift Sending Platform, see 5.6)
- Senior sends physical card — \$4.99, platform prints and mails with senior’s name signed
- Celebration notes — free digital message from senior to family, shareable link or PDF
- Family travel awareness — Aria adjusts call tone when family member is traveling
- New baby/milestone events — Aria congratulates senior, helps coordinate gift

5.5 Gift Sending Platform — 🔄 In progress (Phase 50b, NEW since original vision)

- Gift intent detection in Aria calls → family notification: “[Senior] mentioned wanting to send a gift”
- Gift marketplace: Flowers & Plants, Food & Treats, Books & Activities, Handwritten Cards, Gift Cards, Gift Baskets
- Stub fulfillment: 1-800-Flowers, Goldbelly, Amazon Gift Cards (real integration Month 6 per Parallel Blitz)
- 15% platform commission on all gift orders
- Delivery tracking on family dashboard

5.6 Technology Behind Celebrations

- Celebration Calendar Engine: ✓ Built (celebration_events + family_events tables)
 - Personalization Layer: ✓ Built — pulls from life story entries, preferences, family notes via Anthropic Claude
 - Physical goods fulfillment: ☐ Not yet integrated (Artifact Uprising, 1-800-Flowers — Month 6 target)
 - Celebration Coordinator role: ☐ Not hired (vision: 1 FTE per 2,000 members)
-

6. COMMUNITIES (CULTURAL & INTEREST CIRCLES)

✓ **Built (M14)** — 20 Communities live at /dashboard/communities. Two types: 12 Cultural & Heritage circles (Latino/Hispanic, Chinese-American, etc.) and 8 Interest & Hobby circles (Gardening, Books, Music, Cooking, Faith, Sports, Travel, Crafts). The feature was renamed from “Cultural Circles” to “Communities” — URL /dashboard/cultural-circles redirects to /dashboard/communities. Database table name remains cultural_circles internally.

6.1 Communities Framework — Built Today

Circle Feature	Description	Status
Cultural Community Space	Dedicated group page: feed, posts, event calendar	✓ Built
Language Settings	Full platform UI in member’s language	☐ Roadmap (Phase 55, builds LAST after M27) — English only currently
Cultural Event Calendar	Festivals and heritage events	🔧 Generic events built; specific festival calendar with dates not yet built
Cultural Content Feed	Culturally relevant content	☐ Not yet built
Cultural Companion Matching	Volunteer/buddy matching by cultural compatibility	🔧 Language match scored (+20); specific cultural-heritage matching not yet built
Intergenerational Cultural Bridge	Student matched by cultural heritage	☐ Not yet built

6.2 Launch Communities — All 12 Cultural & Heritage Circles Seeded ✓

Cultural Community	Primary Languages	Key Festivals & Observances
Latino/Hispanic Community	Spanish, Portuguese	Día de los Muertos, Three Kings Day, Posadas, Fiestas Patrias
Chinese-American Community	Mandarin, Cantonese	Lunar New Year, Mid-Autumn Festival, Qingming, Dragon Boat, Chongyang
Vietnamese-American Community	Vietnamese	Tết, Mid-Autumn Festival, Hung Kings’ Day, Buddha’s Birthday
Korean-American Community	Korean	Chuseok, Seollal, Respect for the Aged

		Day (Sept 15)
South Asian Community	Hindi, Urdu, Punjabi, Bengali, Tamil	Diwali, Holi, Eid al-Fitr, Eid al-Adha, Navratri, Pongal
Filipino-American Community	Tagalog, Ilocano, Cebuano	Pasko, Fiesta season, All Saints Day, Flores de Mayo
African-American Community	English	Juneteenth, Kwanzaa, Black History Month, MLK Day
Jewish-American Community	English, Yiddish, Hebrew	High Holidays, Passover Seder, Hanukkah, Shabbat circles
Arab/Middle Eastern Community	Arabic, Farsi, Turkish	Ramadan, Eid al-Fitr, Eid al-Adha, Nowruz
Caribbean Community	English, Haitian Creole, French	Carnival, Haitian Flag Day, Caribbean Heritage Month
Eastern European Community	Polish, Russian, Ukrainian, Czech	Easter (Orthodox + Catholic), Christmas Eve, independence days
Native American / Indigenous	English + tribal languages	Pow Wow season, Native American Heritage Month

At launch, M14 build prioritized Latino/Hispanic and Chinese-American circles to go live FREE in Month 1 per Parallel Blitz strategy — the other 10 follow per the build queue.

6.3 Cultural & Interest Programming — Vision, Not Yet Built

- Virtual Festival Gathering, Community Potluck Coordination, Cultural Story Circle (recorded to life story archive), Intergenerational Heritage Event, Cultural Craft & Cooking Class — all ☐ roadmap (M25, in normal build sequence after M24)

6.4 Language Access Across the Platform — Vision, Not Yet Built

- Full i18n framework and multilingual Aria calls — ☐ Phase 55, builds LAST only after M19 through M27 are all complete. Language Line concierge integration is separate and activates at Month 6 per Parallel Blitz (env var only, does not require the full i18n framework).

7. GRIEF & LIFE TRANSITION

SUPPORT

✓ **Built (M16)** — Core grief and transition pathways are live.

7.1 Loss of a Loved One — Bereavement Support

Built today:

- Grief support request form at /dashboard/grief-support → creates grief_support_requests row
- Check-in frequency auto-updates to daily on submission
- Navigator referral panel: external support referral with type select + notes + Record referral button
- Trusted resources with clickable external links (GriefShare, NAGC, SAMHSA, Hospice Foundation, AFSP, Veterans Crisis Line)
- Anniversary sensitivity — daily check-ins near loss anniversaries
- Prolonged grief detection cron

Vision elements not yet built:

- Structured immediate response protocol (24hr navigator call, community care message, immediate bereavement companion assignment)
- Formal grief circle groups with specific facilitation model (spousal loss, loss of adult child, sibling/friend loss, pet loss, anticipatory grief, cultural-specific circles)
- Life story “tribute story” recording specifically tied to a loss

7.2 Grief Support Groups — Specification (Vision, Not Yet Built)

Group Type	Members	Facilitation	Cadence
Spousal Loss Circle	4-8	Licensed social worker/trained facilitator	Weekly 8wks, then bi-weekly
Loss of Adult Child	4-6	MSW + peer co-facilitator	Weekly 8wks
Loss of Sibling/Friend	6-10	Trained peer facilitator	Bi-weekly
Pet Loss Circle	6-12	Trained peer facilitator	Weekly 4wks, ongoing optional
Anticipatory Grief	4-8	Palliative social worker	Weekly
General Loss & Transition	8-12	Trained grief facilitator	Weekly, open enrollment
Cultural-Specific Grief Circles	Per community	Culturally matched facilitator	Per need

7.3 Nursing Home / Care Facility Transition Support — Partial

- ✓ Built: “Loss of driving independence” pathway, life transition pathway cards
- ☐ Not yet built: facility research support, structured 4–6 week pre-move planning, facility liaison protocol, transition circle support group

7.4 Life Transition Support Pathways — ✓ Built (Phase 43)

5 pathway cards built: Loss of a loved one, Major health diagnosis, Major life change, Support for caregivers, Loss of driving independence

Vision additions not yet built as distinct pathways: divorce/late-life separation, cognitive diagnosis (dementia/MCI) specific pathway, adult child moving away, housing insecurity/forced move

7.5 Professional Support Network — Partial

- ✓ Built: navigator referral tracking, external trusted resources with links
- ☐ Not yet built: formal licensed therapist/counselor network with warm-introduction scheduling, telehealth mental health sessions, chaplaincy network

8. EXPANDED VOLUNTEER ECOSYSTEM

The vision calls for **8 distinct volunteer categories**. Status today:

Volunteer Category	Status	Who They Are	What They Do
Community Volunteers (General)	✓ Built (M13)	Adults applying directly	Phone calls, visits, errands, events
College Students	✓ Built (M13)	University students	Tech help, companionship, life story projects
Veteran Volunteers	🔧 Partial (Phase 57)	Veterans + VSO members	Peer support, benefits navigation, flag ceremonies
Youth in Schools (K-12)	🔧 Partial (Phase 56)	K-12 students	School Partner Portal built; specific curriculum programs (pen-pal, Life Stories project, mentorship reversal) not yet built

Retired Professionals	☐ Not built	Retired doctors, lawyers, CPAs, teachers, engineers	Health literacy circles, legal clinics, VITA tax help, tutoring, tech help
Faith Community Volunteers	Partial	Congregation members	Faith community circle built within Communities; chaplaincy referral network not yet built
Corporate Volunteer Teams	☐ Not built	Employee groups	3-tier programme (Partner/Champion/Leader) not yet built
Neighbor Volunteers	☐ Not built	Same zip code members	Informal check-ins, light coordination
Family Volunteers (Reciprocity)	☐ Not built	Other members' family caring for unrelated seniors	Earn time credits helping other families
Human Buddy (NEW category)	In progress	Volunteer or paid companion, assigned relationship	Weekly/bi-weekly relationship-focused calls — distinct from general volunteering

8.2 Youth in Schools Program — Vision Detail (Roadmap M21/Phase 56)

- Elementary (K-5): pen-pal letter writing
- Middle School (6-8): “Life Stories” interview project
- High School (9-12): mentorship reversal — seniors mentor on life skills, students provide tech help
- Safe by design: all communications facilitated through platform, no direct contact info exchanged

8.3 Veteran Volunteer Network — Partial (Phase 57)

VSO Partner	Volunteer Type	Primary Service	Status
VFW	Combat veterans	Peer support, benefits navigation, flag ceremonies	☐ Named partnership not yet built
American Legion	All-era veterans	Companionship, community events	☐ Not yet built
DAV	Disabled veterans	Benefits navigation, medical escorts	☐ Not yet built

AMVETS	All-era veterans	Community service, peer support	☐ Not yet built
MOAA	Retired officers	Professional mentorship, leadership skills	☐ Not yet built
USO / Student Veterans of America	Active duty families, student vets	Intergenerational programming	☐ Not yet built

VA benefits navigation volunteer track and VAVS export stub are part of Phase 57 build plan.

8.4 Retired Professionals Network — ☐ Not Built (Roadmap M21)

Health literacy circles (retired physicians/nurses), legal clinics (retired lawyers — literacy not advice), VITA tax help (retired accountants), tutoring/book clubs (retired teachers), tech help/home safety (retired engineers), grief facilitation (retired social workers), cooking classes (retired chefs).

8.5 Faith Community Volunteer Network — Partial

- ☒ Built: Faith circle exists as one of the 8 interest communities
- ☐ Not built: formal denominational MOU partnerships, chaplain referral network for spiritual care (non-proselytizing, member-requested only)

8.5a Platform-Wide Additions — Phases 67-72 (build after M20, before M21)

These six features benefit every channel — B2C direct, employer benefits, agency white-label, village/community orgs, and Medicare Advantage. They are not village-specific; they are core platform capabilities that make ThriveAtHome competitive across all markets.

Feature	What It Does	Applies To
Phase 67 — Member Self-Service Portal	Members log in directly (not only through family) to view profile, post needs, see events, update preferences, access life story	All members on all
Phase 68 — Volunteer Self-Service 24/7 Claiming	Volunteers browse and claim open service requests and member needs directly, without navigator/admin intervention	All volunteer categ
Phase 69 — Donations	Record donations, track totals, export donor list for tax receipts, "Donate"	All org types + B2C

Management	option for families	
Phase 70 — Email/Newsletter Broadcast	Any admin composes and sends email to their members/employees/clients; filtered subgroups; schedule; basic stats	All admin roles
Phase 71 — Public Landing Pages	/chapter/[slug], /org/[slug], /employer/[slug] as proper public-facing marketing pages with about, programs, events, volunteer opps, contact form, SEO	All chapters/orgs/emp
Phase 72 — Document Library	Upload/organize/share documents (policies, forms, newsletters, care plans) with role-based visibility; Supabase Storage	All admin roles

Why these matter across all GTM streams: - B2C families: member self-service means seniors can engage directly, not just through an adult child's account - Employer partners: HR admins need email broadcast to enrolled employees and a public landing page for their benefits portal - Agency partners: care coordinators need document library for care plans, policies, training materials - Village/community orgs: all six features are essential for daily village operations - Medicare Advantage: member self-service and document library are required for clinical-grade care management

8.6 Corporate Volunteer Program — 🔄 In Progress (Phase 50l, built early within M17)

A B2B feature distinct from the subscription caregiver benefit — employees volunteer their time on ThriveAtHome (helping seniors generally, not just their own parents), and hours are tracked and exported in formats compatible with corporate giving and volunteer-matching platforms such as Benevity, YourCause, and Bright Funds — the systems companies like Cisco and Genentech use to match employee volunteer hours with cash donations. This captures employer budget from a second line item: the corporate social responsibility/giving budget, separate from the HR/benefits budget that funds the subscription product.

Tier	Annual Price	Hours/Year	Activities	Recognition
Community Partner	\$5,000–\$15,000	50–200	Group volunteer days, meal delivery, event hosting	Partner badge, press support
Community Champion	\$15,000–\$35,000	200–500	+ skills-based volunteering,	Champion recognition,

			mentorship	impact video
Community Leader	\$35,000-\$50,000+	500+	+ strategic partnership, employee ambassador	Naming rights, CEO recognition

Can be sold standalone or bundled with the subscription PEPM caregiver benefit — an employer relationship can include either, both, or grow from one to the other over time.

8.7 Volunteer Platform Infrastructure

Feature	Status
Unified Volunteer Portal	✓ Built (single portal, role-based views in progress)
Background Check Integration (Checkr)	⌘ Built, deferred until activated
Training Library	☐ Not built — formal LMS modules not yet created
Smart Matching Engine	✓ Built (location, interests, sub-type, language, availability scoring)
Impact Dashboard	✓ Built — hours, visits, connections; ☐ LinkedIn credential integration not built
Recognition System (badges, milestones)	☐ Not built — 50/100/250/500hr milestone recognition not yet implemented

9. FAMILY ENGAGEMENT LAYER

9.1 Family Dashboard — ✓ Built (M1-M6)

- Real-time wellness summary, mood timeline, alerts
- Recent highlights, care team directory
- **NEW since original vision:** “Your Buddy” card (Connect+ plans), Family Events Calendar tab, fraud flag alerts, service request details with plain-English status

9.2 Proactive Communication System — ✓ Built (core), ⌘ deferred (delivery channels)

Communication Type	Frequency	Channel	Status
Daily check-in summary	Within 30 min of call	App, SMS	⌘ Built, deferred (needs Twilio/SendGrid)

Weekly wellness digest	Sundays	Email, app	✓ Cron built
Monthly care summary	1st of month	Email, app	✓ Cron built
Real-time alerts	On trigger	Push, SMS	✓ Built (Realtime), SMS deferred
Milestone celebrations	On event	Email, app, physical card option	✓ Built
Gentle nudge to family	7+ days no contact	SMS, app	🔧 In progress (automation rule, Phase 50e)

9.3 Family Coordination Tools — ✓ Built (M1-M6), 🔧 enhanced

- Shared family task board, secure messaging, document vault, care planning
- **NEW:** Family coordination room for celebrations (Phase 50c), Family Events Calendar (Phase 50d), Important Dates & Renewals tracker with document upload (Phase 50j — supersedes narrower Prescription Refill Management from Phase 50a)
- ☐ Not yet built: Family onboarding call as a paid \$29 SKU, remote caregiving resource library

10. HUMAN + AI BALANCE — DESIGN SPECIFICATIONS

10.1 Human-AI Escalation Matrix

Interaction	AI Role	Human Role	Escalation Trigger	Notes
Daily Check-In	Conducts conversation, logs data	Navigator reviews flagged summaries	3+ concerning check-ins	✓
Concierge Line	Triages request	Human transfer for complex needs	Distress detected	"De (M
Medication Reminder	Sends reminders, tracks adherence	Navigator outreach	72hr non-adherence	🔧 — pr in pr
Emergency SOS	Detects anomaly	Navigator + family + 911	Any SOS trigger	✓
Social Isolation Risk	Detects withdrawal	Buddy/volunteer outreach	Isolation score threshold	🔧 ba ve bu

Buddy Concern Flag	N/A	Buddy logs, navigator decides response	Any concern flag	ca 🔴 pr (P 33
Crisis / Mental Health	Detects concerning language; NEVER handles alone	Immediate human navigator	ANY flagged crisis language	✓ ze on re
Celebration Coordination	Generates personalized plan	Navigator handles Enhanced/Premier tiers	Milestone birthdays, sensitive anniversaries	🔴 pr
Fraud Detection	Detects scam patterns in calls/messages	Navigator reviews flag, contacts family	Any fraud pattern match	🔴 pr (P 50
Life Transition Support	Detects transition signals	Navigator leads all pathways	Any reported transition	✓

10.2 Care Navigator Model

- Navigators are care coordinators (vision: MSW/RN/gerontology-certified)
- Unified action feed shows all pending items across all members, prioritized by urgency — redesigned from original simple caseload table concept
- AI prepares navigators before interactions (vision: full pre-call brief; built: alert context shown in member detail panel)
- Vision ratio: 1:150 standard, 1:50 Premier

11. MONETIZATION MODELS — FULL 10-STREAM VISION

#	Model	Primary Buyer	Mechanism	Status
M1	Nonprofit / Grant Funded	Foundations, government, donors	Grants + sliding-scale fees	☐ Not started — ThriveAtHc Foundation planned Year 2-3
M2	Corporate Employee Benefits	Employers	PEPM	🔴 Employee portal MVP built; full PEPM billir not yet built
		Medicare		☐ Not started — outreach

M3	Government Programs	Advantage, Medicaid, VA	Capitated + PMPM	begins after 12mo outcome data
M4	Insurance Partnerships	Health insurers, LTC insurers	License + outcomes PMPM	☐ Not started
M5	B2C — Seniors Direct	Adults 65+	Subscription	☒ Built — Stripe billing live ☒ Gift subscription built; Caregiver Family Plan (\$89/mo) not yet built ☒ Travel Assistance category in progress
M6	B2C — Adult Children	Family caregivers	Gift sub + family plan	☒ In progress (Phases 50b/c/d) ☐ Not started — paid advisor directory listing module not built
M7	Community Hub (Travel + Premium)	Members + B2B	Trip fees, commissions	
M8	Celebrations & Cultural	Members + sponsors	Add-ons, sponsorships, physical goods	
M9	Professional Services Network	Members + providers	Referral fees + directory	
M10	Corporate Volunteer Program	Employer clients	Partner fees + employee hour matching (Benevity/YourCause export)	☒ In progress (Phase 50l)

11.2-11.7 — Full Pricing Detail (B2C, Employer, Government, Insurance — Vision Reference)

M5 — B2C Direct (☒ BUILT AND LIVE)

Plan	Monthly	Annual	What's Included
Thrive Basics	\$19/mo	\$180/yr	Daily check-ins, alerts, family updates, document vault Basics + Communities, events, volunteers, skill exchange,
Thrive Connect	\$39/mo	\$380/yr	

Thrive Complete	\$69/mo	\$660/yr	benefits finder, weekly Human Buddy Connect + navigator (2hr/mo), grief circles, services marketplace, weekly Human Buddy Complete + dedicated navigator (8hr/mo), companion credits (\$50/mo), concierge, bi-weekly priority Buddy
Thrive Premier	\$129/mo	\$1,188/yr	

M6 — B2C Adult Children (Vision — Partial Built)

Product	Price	Status
Gift Subscription (3 month)	\$129 one-time	✓ Built
Gift Subscription (1 year)	\$399 one-time	✓ Built
Caregiver Family Plan	\$89/month	☐ Not built
Long-Distance Caregiver Add-on	\$19/month	☐ Not built
Family Onboarding Call	\$29 one-time	☐ Not built

Companion Device Bundle (Vision — Not Built)

\$99 one-time or \$15/month, included free with 2+ year plan — ☐
Roadmap M22

Marketplace & Add-On Revenue (Vision Targets vs Built)

Revenue Stream	Mechanism	Status
Paid Companion Marketplace	20% platform fee	🔧 In progress (Phase 48)
Transportation Referral	10-15% commission	☐ Not started
Home Services Marketplace	12-18% commission	🔧 In progress (Phase 46)
Meals & Nutrition	Per-meal commission	🔧 In progress (Phase 46)
Trusted Advisor Directory	\$2,400-\$6,000/advisor/yr	☐ Not started

University Partnerships	\$5K-\$20K/campus/yr	☐ Portal not built; first contract targeted Month 4
Gift Sending Commission	15% per order	In progress (Phase 50b)
Celebration Add-Ons	\$25/\$75 coordination fees	In progress (Phase 50c)
Skill Exchange / Communities Premium	\$5-9/month add-ons	☐ Not built

Premium Add-On Services Catalog (Full Vision — Mostly Not Built)

Add-On	Price	Status
Extra Care Navigator hours	\$25/hour	☐ Not built
Companion Device	\$99 one-time or \$15/mo	☐ Not built
Paid Companion Credit Bundle	\$100 for \$120 credits	☐ Not built
Home Safety Assessment (virtual)	\$49 one-time	☐ Not built
Annual Care Planning Session	\$149/session	☐ Not built
Family Onboarding Call	\$29 one-time	☐ Not built
Benefits Maximizer Deep-Dive	\$79 one-time	☐ Not built
Milestone Birthday Memory Book (70th/75th/80th specifically)	\$49 one-time	General Memory Book built; age-milestone-triggered version not built
Physical Birthday Card (family co-signed)	\$9.99 one-time	Senior-to-family card built (\$4.99); family-co-signed-to-senior version not built
Skill Exchange Premium	\$9/month	☐ Not built
Communities Premium	\$5/month	☐ Not built
Volunteer Concierge (premium matching)	\$19/month	☐ Not built
Extra annual legal consultation	\$75/consultation	☐ Not built

12. PHASED PRODUCT ROADMAP — RECONCILED

The original vision’s Phase 0-4 roadmap and the actual build’s M1-M27 milestone structure are different numbering systems for the same journey. Here’s the mapping:

Original Vision Phase	Maps to Actual Build Milestones	Status
Phase 0 — Foundation (Months 1-3)	M1-M6 (Foundation), M7 (Navigator), M11 (Billing), M12 (HIPAA)	✓ Complete
Phase 1 — Launch (Months 4-6)	M13 (Volunteers), M17 partial (Services), early M8/M9/M10 activation	🔄 In progress
Phase 2 — Community (Months 7-12)	M14 (Community), M15 (Celebrations), M16 (Grief)	✓ Complete
Phase 3 — Enterprise (Year 2)	M18 (Enterprise), M19 (Care Industry Partnerships)	☐ Not started
Phase 4 — National Scale (Year 3)	M20 (Community Orgs, no longer deferred), M21-M27 (Future Roadmap)	☐ Not started
Final — Language Access	Phase 55 Full Multilingual UI — builds LAST, only after M19 through M27 are all complete	☐ Not started

Actual Build Status Detail (M1-M20)

Milestone	Phases	Status
M1-M6 Foundation	1-28	✓ COMPLETE
M7 Navigator Console	15-16	✓ COMPLETE (redesigned to unified action feed)
M8 AI Calls	—	⏸ DEFERRED (built, awaiting Retell AI credentials)
M9 Concierge Line	—	⏸ DEFERRED
M10 SMS/Email	—	⏸ DEFERRED
M11 Billing	24-26	✓ COMPLETE
M12 Compliance	27-28	✓ COMPLETE (BAAs pending signature)
M13 Volunteer Network	29-33	✓ COMPLETE
Phases 33a-33f Human Buddy	33a-33f	🔄 IN PROGRESS (NEW — not in original vision)
M14 Community Layer	34-38	✓ COMPLETE

M15 Celebrations & Life Story	39-41	✓ COMPLETE
M16 Grief & Transitions	42-44	✓ COMPLETE
M17 Services Marketplace	45-50 + 50a-50k	🔧 IN PROGRESS
M18 Enterprise	51-54 (Phase 55 moved to after M21)	☐ NOT STARTED
M19 Care Industry Partnerships	59-62	☐ NOT STARTED
M20 Community Organizations	63-66	🔧 IN PROGRESS — Phase 64 complete, Phases 63/65/66 in progress

M20 Detail — Phase by Phase:

Phase	Name	What It Builds	Status
63	Village / Community Organization Portal	community_orgs, org_programs, org_memberships, member_needs tables; sliding-scale dues; needs bulletin board; Bay Area Village Network seeded with 3 programs	🔧 In progress
64	Area Agency on Aging Portal	area_agencies_on_aging, aaa_service_units, oaa_client_assessments tables; Title III tracking (III-B/C1/C2/D/E); NAPIS 17-column CSV export; Bay Area AAA seeded	✓ Complete
65	Senior Center Portal	senior_centers, center_dropins, center_activities, room_bookings, congregate_meals tables; drop-in tracking; activity calendar; room booking; SF Senior Center seeded	🔧 In progress
66	Network Federation	network_accounts, network_dues tables; VtVN and n4a seeded; aggregate reporting; anonymized benchmarking; /network-admin portal	🔧 In progress

Revenue model: Annual license fee per organization — \$2,400 (Starter, up to 100 members), \$6,000 (Growth, up to 500 members), \$15,000 (Scale, unlimited members). Separate from per-member B2C subscription revenue. | M21-M27 Future Roadmap | See table below | ☐ NOT STARTED — builds after M20, in sequence | | Phase 55 Full Multilingual UI | — | ☐ NOT STARTED — builds LAST, only after M27 completes |

Future Roadmap — M21-M27 (Captures Remaining Original Vision Gaps)

Milestone	Captures From Original Vision
M21 — Expanded Volunteer Ecosystem	Retired Professionals, Chaplaincy, Neighbor Volunteers, Family Reciprocity, Member Ambassador, Youth K-12 curriculum, Intergenerational Showcase (Corporate Volunteer Program moved earlier — built as Phase 50l within M17)
M22 — Device & Smart Home Integration	Companion Device, Alexa/Google Assistant, smart home (Echo/Nest/Ring/ADT), wearables, fall detection, EHR connectors
M23 — Advanced AI/ML Layer	Wellness baseline ML, behavioral anomaly detection, fall risk prediction, NLP-based isolation/grief detection
M24 — Professional Services Revenue Layer	Paid Trusted Advisor Directory, VITA integration, 988/SAMHSA embedding, document vault
M25 — Cultural Programming Depth	Festival calendars, potluck coordination, story circles, oral history archive
M26 — Premium Subscription Add-Ons	Caregiver Family Plan, all 11 premium SKUs from Section 11
M27 — Pet & Companion Life Tracking	Pet profiles, pet birthday/anniversary, pet loss circle
Phase 55 — Full Multilingual UI (moved from M18, builds LAST)	Full i18n framework, next-intl, Spanish first then Mandarin/Vietnamese/Tagalog, multilingual Aria calls, Language Line. Builds only after M19, M20, M21, M22, M23, M24, M25, M26, AND M27 are all complete — the final feature on the entire roadmap.

13. FINANCIAL PROJECTIONS

13.1 Long-Term Full-Scale Vision (3-Year, from original Comprehensive Specs)

G&A / Compliance / Legal	\$1M	\$2M	\$4M
TOTAL OPEX	\$10.3M	\$30M	\$70M

14. CORPORATE STRUCTURE — NEW SINCE ORIGINAL VISION

(Original vision did not specify entity structure — this section is wholly new, from Corporate Structure v1.0 doc, June 2026)

- **Entity:** Delaware C-Corporation with Public Benefit Corporation (PBC) designation, filed simultaneously
- **Why not LLC:** Every VC, angel, accelerator, and acquirer expects a Delaware C-Corp; LLC converts poorly and has no preferred

stock instrument

- **Formation:** Stripe Atlas or Clerky (~\$500-\$800). Issue 10,000,000 founder shares at \$0.0001/share. File 83(b) election within 30 days. Reserve 10-15% ESOP at formation. 4-year vesting, 1-year cliff.
 - **B Corp Certification:** Start B Impact Assessment Month 3-4 (~\$2K-\$5K). Unlocks university procurement preference, impact investors, AARP/foundation partners.
 - **ThriveAtHome Foundation:** Separate 501(c)(3) using 1% revenue model, formed Year 2-3 once ARR exceeds \$500K — funds subsidized Community Access memberships for low-income seniors. *(This directly fulfills the original vision's M1 — Nonprofit/Grant Funded revenue stream.)*
 - **Pre-seed funding:** SAFE note \$100K-\$500K. Target impact investors: Pivotal Ventures, Andreessen Horowitz Bio Fund, Obvious Ventures, AARP Foundation investment arm.
-

15. LAUNCH STRATEGY — PARALLEL BLITZ (NEW SINCE ORIGINAL VISION)

(Original vision's Phase 0-4 roadmap was generic by quarter. Strategy v4's Parallel Blitz is the specific, actionable near-term execution sequence.)

Formal Launch Protocol — Human-First, AI-Optional

Core Principle

Trust is earned before technology is introduced. The first 30 days are human-only. Aria AI calls are **opt-in** — seniors choose if, when, and how often Aria calls them. Default is NO.

The Four Roles

Role	Who	Notes
Daily wellness pulse	Aria AI (opt-in only)	Only when senior explicitly consents
Weekly meaningful conversation	Human buddy/volunteer	Always — regardless of Aria choice
Crisis response	Human navigator (always)	Never AI — immediate human callback
First 30 days	Human navigator exclusively	Do not automate this period
Navigator operations	AI-assisted	Task routing, alert triage, documentation
Data intelligence	AI (M23 ML layer) AI-drafted,	Pattern detection, fall risk, isolation signals Navigator adds personal

Family reporting human-reviewed note before sending

30-Day Launch Sequence

- **Days 1-7:** Navigator personally calls within 24 hours. Builds relationship. Does NOT mention Aria.
- **Days 8-20:** Navigator calls 1-2x/week. Buddy introduced and matched. Human rhythm established.
- **Day 21:** Navigator gently introduces Aria option. Plays sample call if member wants to hear it. Member decides — no pressure. Default is NO.
- **Day 30+:** Aria calls begin ONLY for members who opted in. Human buddy continues weekly regardless.

Aria Opt-In Design

- Onboarding default: **NO** — senior must actively choose yes
- Options: “Yes daily” / “Yes less often” / “No thank you”
- Changeable anytime from /member-portal → Notifications tab
- “Request a check-in from my navigator” button always visible for opt-out members

Navigator Role — AI-Augmented, Human-Led

- AI drafts family digests → navigator personalizes before sending
- AI triages alerts → navigator acts immediately on HIGH urgency
- AI detects patterns → navigator follows up with human contact
- Target: 60% relationship/crisis, 25% AI insight review, 15% admin

Competitive Differentiation

Unlike DUOS (AI only, payer-locked), Papa (human only, payer-locked), or Homethrive (family-facing only): **ThriveAtHome is the only platform where the senior controls if AI contacts them, AND always has a real navigator and real buddy — regardless of their AI choice.**

AI Voice Agent Architecture — 12 Named Agents (September 2026)

#	Name	Role	Voice	Vercel E
1	Aria	Daily morning companion (outbound)	Warm F, 60s, unhurried	RETELL_AGENT
2	Rosa	Care Line — service requests (inbound)	Warm F, 45, efficient	RETELL_ROSA_
3	Joy	Celebration calls — birthdays/milestones (outbound)	Joyful F, celebratory	RETELL_JOY_AG
4	Grace	Reminder calls — appointments/welfare (outbound)	Clear warm F, purposeful	RETELL_GRACE

5	Hope	Crisis support line — 24/7 (inbound)	Calm grounded F	RETELL_HOPE_7
6	Claire	Family support line (inbound)	Professional warm F	RETELL_CLAIRE
7	Sam	Volunteer support line (inbound)	Friendly gender-neutral	RETELL_SAM_A
8	Morgan	Buddy support line (inbound)	Warm supportive F	RETELL_MORGA
9	Nova	Navigator assistant — internal only (inbound)	Clear professional	RETELL_NOVA_7
10	Alex	Staff support line (inbound)	Professional gender-neutral	RETELL_ALEX_A
11	Quinn	Concierge — 24/7 + Language Line bridge (inbound)	Warm capable F	RETELL_QUINN
12	Jordan	Partner support line — B2B (inbound)	Business professional	RETELL_JORDAN

Deferred (Phase 55): Ming (Mandarin), Devi (Hindi), Luna (Spanish) — launch with multilingual UI in order: Mandarin → Hindi → Spanish.

Aria opt-in: Default is NO. Senior must actively choose Aria calls. Human navigator calls first 21 days. See Launch Protocol document.

New database columns (September 2026):

members.aria_call_opted_in (bool), members.check_in_frequency (text), members.grief_loss_type (text), members.preferred_contact_method (text), members.family_can_see_mood (bool), members.family_can_see_call_summaries (bool), members.family_can_see_service_history (bool), members.family_can_see_alerts (bool).

Strategy D — Parallel Blitz (updated June 2026): Launch B2C subscriptions + free Communities (12 cultural heritage circles + 8 interest groups) + university/MSW partnerships + **Grief Welcome Path** simultaneously from Month 1 — not sequentially. Aria calls must be live Week 1. **The 12-month Aria data clock for Medicare Advantage starts at Week 1 — this is why Week 1 activation is non-negotiable.**

Updated timing (three strategic changes from Competitive Positioning v2.0): 1. **Grief Welcome Path moves to Month 3** (was Month 6) — highest-LTV retention segment, bereaved/widowed seniors stay 3+ years, no competitor has this pathway, requires no unbuilt technology 2. **Employer outreach starts Month 4-5** (was Month 9-10) — enterprise sales cycles are 5-6 months; starting at Month 4-5 means first contracts close at Month 9-10, not starting then 3. **Grant applications submit Month 3** (RWJF Health Equity, AARP Foundation, local community foundations) — parallel revenue track that funds first navigator without equity dilution; B Corp certification (Month 3-4) unlocks most grants 4. **No MA sales**

motion before Month 12 — DUOS has \$130M and is pitching the same MA plans; ThriveAtHome needs 12 months of outcomes data (Phase 76) before any MA conversation is credible

First 30 Days — Daily Action Plan

Day	Priority	Required Output
1-2	Business formation	Delaware C-Corp + PBC, EIN, business bank account
2-3	Core accounts	Supabase, Vercel, Twilio, Retell AI, Anthropic, SendGrid, Stripe, Checkr
3-5	APIs + Aria test	All credentials in Vercel. Aria calls your own phone.
5-7	Legal	Attorney engaged. BAAs submitted. Volunteer Agreement covers buddy role.
8-10	First enrollments	5 seniors enrolled. Buddy matching questions visible in onboarding.
10-11	Communities	Latino/Hispanic + Chinese-American Communities live.
12-13	University outreach	3 social work chairs contacted.
14	End-to-end test	Aria call → alert → family SMS → navigator action → buddy concern flag tested.
15-21	Validate + expand	Interview 5 families. 65+ usability test. Enroll seniors 6-12.
22-24	Stripe live	Charge \$1/mo to confirm payment flow.
25-28	Meals + Handshake	Meals referral live. Handshake posting live.
29-30	Month 1 review	Adjust Month 2 plan based on data.

Delivery Partner Go-Live Schedule

Month	Partners Activated
Month 1	Retell AI, Twilio, Anthropic, SendGrid (Week 1)

Month 3	Meals on Wheels (free) · Launch Grief Welcome Path · Submit RWJF + AARP Foundation grants
Month 4	First university contract signed
Month 6	GoGoGrandparent, Instacart Business, Language Line, Artifact Uprising
Month 9	Lyft Healthcare, Angi/TaskRabbit
Month 10-11	First full-time care navigator hired; SOC 2 Type I started
Month 12	Teladoc/MDLive

Competitive Moat Analysis

Moat	Build Time	How It Compounds	Action Now
Communities (cultural + interest)	3-6 months	Each member recruits 2-3 more from same community	Launch Latino + Chinese-American Month 1, free
Buddy relationships	6-12 months	Named buddy who calls weekly = will not cancel	First assignments Month 5
Aria call data	12-18 months	Every call adds to MA outcomes story	Activate Retell + Anthropic Week 1
Life story archive	Immediate	Families with life story data never cancel	Promote in onboarding for every member
Aria signal-to-dispatch	6-9 months	Each delivery partner deepens detection-to-action loop	Integrate GoGo + Instacart Month 6
University relationships	3-6 months	Students → professionals refer for 30+ years	Recruit MSW programs Month 2

16. SUCCESS METRICS & OUTCOMES — FULL VISION TARGETS

16.1 Senior Wellbeing Outcomes (Long-Term Clinical Targets)

- ER visits reduced 25%+ vs baseline
- Loneliness: 30%+ improvement on UCLA Loneliness Scale
- Medication adherence: >85%
- Fall-related hospitalizations: 20%+ reduction
- Purpose/contribution scores: 40%+ improvement for skill exchange participants
- Senior NPS: target >65

16.2 Community & Engagement Metrics

- Check-in completion rate: >80% weekly
- Event participation: >50% monthly
- Skill exchange: >30% participate within 90 days
- Interest group retention: >70% active at 90 days
- Volunteer match fulfillment: >85% within 48 hours
- Student network hours: 10,000+/year by Year 2

16.3 Celebrations & Cultural Metrics

- Birthday engagement: >85% of connected members
- Family coordination rate: >60% of birthdays
- Communities participation: >40% of non-English-primary members within 60 days
- Cultural event attendance: >50% monthly
- Language accessibility: >90% task completion in native language

16.4 Grief & Transition Support Metrics

- Bereavement response: 100% within 24 hours
- Grief circle participation: >50% within 30 days
- PGD detection: >80% within 90 days
- Nursing home transition retention: >70%
- Transition support satisfaction: >85%

16.5 Volunteer Ecosystem Metrics

- Total active volunteers: 5,000 (Y1) → 25,000 (Y2) → 50,000 (Y3)
- School partnerships: 25 → 150 → 500
- Volunteer fulfillment: >88% within 48 hours
- Volunteer retention: >65% at 12 months
- Corporate partnerships: 10 → 100 → 300
- Veteran volunteer network: 2,000 active by Y2
- Volunteer NPS: >70

16.6 Near-Term KPI Dashboard (Parallel Blitz — realistic Month 3/6/12)

Metric	Month 3	Month 6	Month 12
Active paying subscribers	20	100	400+
Aria call completion rate	>75%	>85%	>90%
Daily call opt-down rate	<20%	<15%	<10%

Monthly churn	<8%	<5%	<3%
Family dashboard DAU/MAU	>25%	>40%	>50%
Buddy assignments active	0	20+	80+
Buddy call completion rate	—	>80%	>85%
Buddy matching fulfilment	—	<7 days	<5 days
Alert-to-human-action rate	>60%	>70%	>80%
Cultural circle active members	30+	150+	500+
University partnerships signed	0	2	4-5
Navigator caseload ratio	<50:1	<100:1	<150:1
NPS score	>40	>50	>60

16.7 Financial & Business Metrics (Long-Term Targets)

- CAC: <\$120 B2C; <\$15,000 employer; <\$200,000 MA plan
- LTV:CAC ratio: >15:1 at steady state
- Monthly churn: <2% B2C; <0.5% enterprise
- Gross margin: >70% by Year 2
- Marketplace GMV: \$10M+ by Year 3

17. FOUNDING TEAM & KEY ROLES — FULL-SCALE VISION

Role	Responsibilities	Ideal Background	Hiring Priority
CEO / Co-Founder	Vision, fundraising, partnerships, culture	Aging/healthcare innovation	Founder (now)
CTO / Co-Founder	Platform architecture, AI strategy	Full-stack, healthtech, AI/ML	As needed
Chief Care Officer	Care navigator model, clinical protocols	Gerontology, social work	After Series A
VP Product	Roadmap, UX, accessibility	Consumer health product	After Series A
VP Sales — Enterprise	Employer + insurance + government BD	Healthcare enterprise SaaS	When first MA conversation begins
VP Marketing / Growth	Brand, B2C acquisition	Consumer health marketing	After Series A
Head of Community Programs	Volunteer, student, skill exchange, Communities (cultural + interest circles)	Community organizing	When 500+ members

Head of Cultural Engagement	Cultural strategy, language access	Multicultural community organizing	When 1,000+ members
Head of Grief & Transition Services	Grief pathways, professional network	Clinical social work, palliative care	When 1,000+ members
Head of Volunteer Ecosystem	All volunteer categories	Volunteer management	When volunteer count exceeds navigator capacity
Head of Partnerships	Nonprofit, government, university	Aging services, gov affairs	When first university contract signs
Lead Data Scientist	AI models, outcomes research	ML/NLP, health data	When MA outreach begins
Head of Compliance	HIPAA, SOC2, gov contracting	Healthcare compliance, legal	Before first MA contract

Immediate near-term hiring (per Strategy v4): First Care Navigator at Month 10-11 (part-time contractor acceptable initially). Everything else follows funding and scale milestones above.

18. COMPETITIVE LANDSCAPE & DIFFERENTIATION

Updated Competitive Intelligence — v2.0 (June 2026)

New high-priority threats identified: - **DUOS** — \$130M raised Oct 2025, targeting same MA plans ThriveAtHome plans for Year 2. Response: Phase 76 MA Outcomes Data Package now URGENT. - **Homethrive** — \$64M raised, won 2026 Lighthouse Tech Award for employer ROI. Direct employer channel competitor. Response: Phase 74 Employer ROI Dashboard. - **Sensi.AI** — \$98M raised Oct 2025, courting same agencies ThriveAtHome needs as partners. Response: Phase 77 Agency Visit Tracking Upgrade. - **Mon Ami** — building competing org software for same Village nonprofits as M20. Response: Phase 73 HV Partnership API must ship before Mon Ami locks in these orgs.

Strategic verdict: Helpful Village is a distribution channel, not a competitor. DUOS is the most urgent competitive threat.

Competitor	Type	Threat	Key Gap ThriveAtHome Fills
DUOS	AI benefit navigation (MA/Medicaid payer-only)	● HIGH — MA channel	Payer-locked, no B2C, no daily voice, no community, no cultural circles

Homethrive	Employer caregiver benefit (family-facing only)	● HIGH — employer	Family-only — no senior-facing product, no Aria, no community
Sensi.AI	Ambient audio monitoring for agencies	● MEDIUM — agency mindshare	Passive surveillance vs ThriveAtHome's chosen daily conversation
Mon Ami	Org operations SaaS for nonprofits	● MEDIUM — org software	Org ops only — no consumer product, no AI, no family dashboard
Meela	AI voice companion (conversation only)	● MEDIUM — Aria analog	Feature only, no ecosystem — potential acquire Year 2
Papa Inc.	Companion visits via MA/employer payer	● MEDIUM — MA channel	Payer-locked, no AI check-ins, no community, no B2C path
Best Buy Health / Current Health	Remote patient monitoring	● LOW — complement	No community, no AI conversation, no cultural layer
GrandPad	Simplified tablet device	● LOW	Device only — no care, no community, no AI
Helpful Village	B2B org ops for Village networks	● LOW — DISTRIBUTION PARTNER	No AI, no family dashboard — turn into channel via Phase 73
Carely / Well	Family coordination apps	● LOW — complement	Senior absent from product — complement, not replacement
Home Instead / Visiting Angels	Professional in-home care	● LOW — complement	10x ThriveAtHome's cost, no tech layer — referral source
Local Senior Centers	In-person programming	● LOW — distribution	Geographic limitation — turn into channel via M20

Category Strategy: Own “Senior Belonging Platform”

ThriveAtHome must own and name a new category before any competitor does: **“Senior Belonging Platform.”** Every press mention, investor deck, brand asset, and sales pitch should use this language. Category creation lets ThriveAtHome define the rules competitors must compete on.

Four Acquisition Modes (revised strategy)

Mode	CAC	Best Targets
Mode 1: New segments	Lowest	Non-English seniors (20M+), rural isolated (12M+), recently bereaved/widowed, caregiver employees at 500-5,000-person companies
Mode 2: Complement	Low-Medium	Medical alert subscribers, GrandPad families, agency client referrals
Mode 3: Displacement	High	Caring Village users, Meela users
Mode 4: Distribution channel	Near zero	Helpful Village 350+ orgs, home care agencies (Phase 78), hospital discharge planners (Phase 79), Mon Ami orgs

Start with Modes 1 and 4 before investing in Mode 3 displacement.

B2B Provider Software — Partners, Not Competitors

WellSky, Homecare Homebase, AlayaCare, and AxisCare run 11,000+ home care agencies. They are integration partners, not competitors. ThriveAtHome slots in alongside them as the **member wellness layer** agencies currently have zero of.

Platform	Market Position	What It Does	What ThriveAtHome Adds
WellSky Personal Care	Market leader, non-medical home care	Scheduling, billing, EVV, caregiver app, family portal (schedule only)	Member wellness between visits — Aria daily check-ins, mood trends, alert detection, family wellness summary
Homecare Homebase	Default for large agencies	Clinical documentation, scheduling, billing, OASIS	Zero member engagement — client disappears after visit. ThriveAtHome fills this gap.
AlayaCare	Mid-large agencies	Scheduling, telehealth, Layla AI (caregiver-facing only), route optimization	Layla is caregiver workflow only — no member wellness, no community, no daily check-ins Pure operational

AxisCare / CareSmartz360	SMB agencies	Scheduling, EVV, billing	tool — zero member experience
Sensi.AI	AI monitoring add-on	24/7 ambient audio, care alerts, agency automation	Passive surveillance vs ThriveAtHome's chosen daily conversation

Agency channel pitch: “Your caregivers visit 3×/week. ThriveAtHome is there the other 4 days. You keep WellSky for scheduling and billing. We complete the member experience.”

What ThriveAtHome explicitly does NOT do (leave to WellSky/Homecare Homebase): - EVV (Electronic Visit Verification) — federally mandated, state-by-state, licensed agency territory - Medicare/Medicaid billing and claims - Full EHR / OASIS assessments, physician order management - Ambient audio surveillance (Sensi.AI model) — conflicts with dignity-first principles

Senior Care Facility Platforms — Out of Scope

PointClickCare, MatrixCare, Yardi Senior Living run assisted living, nursing homes, and memory care facilities. **ThriveAtHome serves only independent aging-at-home seniors.** When a member transitions to a facility, ThriveAtHome provides transition support (Phase 43) and maintains the family dashboard connection, but does not manage facility operations.

Helpful Village Feature Parity — Gap Tracker (June 2026)

HV Feature	ThriveAtHome	Phase to Fix
Member management + renewals	🔌 Partial	Phase 63 fixes
Volunteer 24/7 self-service	🔌 Partial	Phase 68
Member service request posting	🔌 Partial (name dropdown bug)	Phase 63 fix
Events management + RSVP	✓ Complete	—
Email + newsletters with filtering	🔌 Partial	Phase 70 enhancement
Donations management	🔌 Partial	Phase 69
Document library	🔌 Partial (upload bug)	Phase 72 fix
Public village website	🔌 Partial	Phase 71
Wellness check-ins	✓ SUPERIOR (Aria > HV's \$10/mo add-on)	—
SMS texting	⏸ Deferred ☐ Add Zoom link field	Twilio credentials

Zoom module (\$10/mo in HV)	to events	Minor
Maps/geocoding (\$10/mo in HV)	☐ Not built	Low priority
Pricing (\$50/mo for small villages)	✓ Now spec'd	Phase 73: \$49/\$149/\$349/mo
30-day free trial	✓ Now spec'd	Phase 73
Data migration from HV	✓ Now spec'd	Phase 73: \$1,500 service

ThriveAtHome features with zero Helpful Village equivalent:

Aria daily AI check-ins · Family proactive wellness dashboard · Human Buddy programme · Care navigator coordination · 20 Communities (cultural + interest circles) · Grief & life transition support · Life story archive · Memory Books · Skill exchange/time banking · Full services marketplace · Personalized celebrations · Geographic chapters · B2C subscription path · Employer PEPM · Medicare Advantage pathway · Corporate volunteer with Benevity/YourCause export

ThriveAtHome is the only platform that integrates: (1) proactive AI voice check-ins, (2) 24/7 concierge phone line, (3) paid companion marketplace, (4) volunteer + student networks, (5) skill exchange time banking, (6) persistent interest groups, (7) virtual + local events, (8) full services marketplace including meals, (9) family proactive reporting, (10) human care navigation, (11) personalized celebrations, (12) 20 Communities (12 cultural heritage circles + 8 interest/hobby groups) with language support for cultural heritage circles, (13) grief and life transition support pathways, (14) an 8-category volunteer ecosystem, **(15) a dedicated Human Buddy relationship programme — distinct from AI and admin layers**, and **(16) geographic chapter communities** — all in a single platform, across multiple funding models, owned end-to-end by one trusted consumer brand.

APPENDIX A — GLOSSARY

Term	Definition
AAA	Area Agency on Aging
ACO	Accountable Care Organization
APS	Adult Protective Services
Aria	ThriveAtHome's AI care companion conducting daily check-in calls
BAA	Business Associate Agreement (HIPAA)
Buddy / Human Buddy	Assigned human relationship-focused volunteer or paid companion — distinct from Aria (AI) and Navigator (admin)
Celebration Coordinator	Platform staff role for milestone celebration coordination (vision, not yet hired)
	Soft geographic grouping of

Chapter	members by metro area; activates as official chapter at 50+ members
CMMI	Center for Medicare and Medicaid Innovation
Communities	Unified feature combining Cultural Circles + Interest Groups (20 total at launch)
Communities	The unified feature name for all 20 community circles — 12 Cultural & Heritage (formerly “Cultural Circles”) + 8 Interest & Hobby groups. Found at /dashboard/communities.
DAV	Disabled American Veterans
ERG	Employee Resource Group
HCBS	Home and Community-Based Services
HIPAA	Health Insurance Portability and Accountability Act
MA Plan	Medicare Advantage
Member Ambassador	Experienced member welcoming new members (vision, not yet built)
MOAA	Military Officers Association of America
Navigator	Human care coordinator — admin/crisis response role
NEMT	Non-Emergency Medical Transportation
PBC	Public Benefit Corporation
PEPM	Per Employee Per Month
PMPM	Per Member Per Month
RSVP Program	Retired and Senior Volunteer Program (federal)
Time Banking	1 hour of service = 1 time credit, regardless of service type
VA	US Department of Veterans Affairs
VAVS	VA Volunteer Service
VFW	Veterans of Foreign Wars
VITA	Volunteer Income Tax Assistance
VSO	Veterans Service Organization

APPENDIX B — DOCUMENT CHANGE LOG

Version	Date	Change
---------	------	--------

v1.0 (Comprehensive Specs)	May 2025	Original full vision — 5 layers, 10 revenue streams, 8-category volunteer ecosystem
v2.0-v4.0 (Build Phases)	2026	Tactical build documents tracking M1-M20 actual implementation
Strategy v4	June 2026	Parallel Blitz launch strategy, realistic near-term financial ramp
Buddy Build Spec	June 2026	Human Buddy programme — NEW concept not in original vision
Aria Research v4	June 2026	Evidence-based Aria language rules, adaptive call frequency
Corporate Structure	June 2026	Delaware C-Corp + PBC, B Corp, Foundation, equity structure — NEW, not in original vision
v5.0 (this document)	June 2026	Master reconciliation — combines full v1.0 vision with everything built/added through June 2026. Nothing lost from either source.

Document: ThriveAtHome Comprehensive Platform Specification — Master Edition v5.0 Status: Confidential — internal planning and authorized investor/partner discussions only Owner: Monica Mallick
This document supersedes:
ThriveAtHome_Platform_Specs_Comprehensive.docx (May 2025),
ThriveAtHome_Platform_Overview.md (v1.0),
ThriveAtHome_Build_Phases_v4.md as the vision reference (Build Phases v4 remains the tactical build-tracking document for day-to-day development) Next review: *When M17 completes, M18 begins, or major strategy shift occurs*
